DEDICATION

To those who think that they know everything

Scholars are afraid of being wrong, but draughts and forty years in global business have prepared me for taking risks and arriving at new places, violating rules, conventions, and expectations. My failures have been my greatest teachers on the path to being an expert and stepping stones to personal successes.

Preface

If this research about Hernando Díaz did not seem highly readable and interesting enough for the lovers of *La Celestina*, I would not have translated so many Spanish texts and published the work in English, because I did it for no financial gain. I am not interested in praising the book and recommending it to readers. The real connoisseurs will understand its merit without my (re)commendations of it. I also would not contradict or challenge the experts on *La Celestina* highlighting the errors which I may have incurred; my great ignorance of the Spanish language and literature does not consent it.

The words of my colleague and partner Professor Francisco Sabater¹ (1930-1997) when our company Zoster S.A. was number 1 in the world of the orange extract Hesperidin used in medicines always come to my mind:

"We still do not know anything about Hesperidin."

In those years Sabater was the rector of the University of Murcia and I was lucky enough to work with this genius in the innovation and business of natural plant extracts. We can apply his words to the chess history in Spain in connection with Lucena because after all my efforts of several years we still do not know anything about Lucena.

¹ Former rector of the University of Murcia in 1975-1980. I travelled with him on various occasions in the eighties to countries such as France, Germany, Austria, and Brazil, and we had extensive talks about research.

Later on, leafing through the NEBEA² book I saw a draughts manuscript of Juan Antonio Ardila Bohórquez. Then I remembered his words because he thought that Lucena was nobody else than Francesch Vicent³. At the time I discussed this issue with Garzón, but there was nothing that went in that direction and Garzón did not believe in Francesch Vicent. So I continued my studies in 2006 in the direction of Juan del Encina. I never forgot the words of Ardila Bohórquez.

During those years I was heavily involved in the history of draughts - a game invented by Francesch Vicent around 1495 - and a year earlier Nebrija⁴ published his Hispano-Latinum dictionary in Salamanca. In this dictionary we find the new powerful dama in the new draughts (checkers) - and modern chess⁵ as a result of the

³ Mr. José Antonio Ardila Bohórquez informed me in January 2004 that he spoke with Dr. Ricardo Calvo before his death in 2002. The chess master confessed to him that Lucena (son) had a friendship with a musician named Juan de Fermoselle of Zamora. At first I did not pay attention to this comment and followed the line of investigation of Francesch Vicent, but research later confirmed these facts. I could not confirm the hypothesis that Francesch Vicent and Lucena were the same person. Neither did Garzón believe in this possibility. Today I must confess that José Antonio Ardila Bohórquez was right with his idea.

change of andarraya. Further on the alquerque is mentioned in this dictionary referring without a doubt to the alquerque of 12⁶. This game with 12 pieces was transferred to the chessboard and so the new game was called *marro de punta*, which changed to *juego de las damas* fifty years later - around 1550. Nebrija was probably helped by Lucena, because Lucena was the only one with knowledge of chess and draughts (checkers).

In the third week of December 2012 I stumbled upon the biography of an Italian person and immediately thought of Francesch Vicent. So I started reading more about him and saw that he was employed at the Apostolic Chancery in Rome. He had contacts with Vittoria Colonna. I quickly came to the conclusion that he was none other than the person who called himself Bartolomé Torres Naharro. With all these details in hand it was clear to me that I had to change my way of thinking about Juan del Encina. If Juan Ramírez de Lucena had two sons and worked in 1468 with Prince Ferdinand, it was perfectly possible that this new person who called himself Francesch Vicent in his chess book of 1495 and used the name Lucena in another chess book of 1497 was indeed the son of the prothonotary Juan Ramírez de Lucena. Therefore I will now focus my original research on Lucena and his father. However, I must say that this is turning into not historical work, but much more of an analytical work. Hopefully other experts In *La Celestina* and chess historians

will improve my work in future so that we get a much better understanding of the Lucena family.

Before writing more I will comment on the matter of intuition. I agree with the fact that for writing history we need documents. And what do we do when we do not have documents? Or which way should we choose to obtain the necessary documents? In draughts (checkers in the USA) we must constantly innovate to achieve victory. I always liked product innovation with a strategy for at least 10 years ahead. The process of seeking solutions for a new product was for me like playing draughts because in this game one has to consider various variants to get the best move.

Ex-world champion Dr. Max Euwe once had a conversation in New York with a world checkers champion Dr. Marion Tinsley. That's checkers on a checkerboard - a slightly simpler form of our international draughts (on a 100-square board). He confided in me⁷: "If I want a quiet game with not too much effort, I will play chess. With checkers I must already be very careful at the third or fourth move that I do not do anything wrong, I have to calculate deeply, because one mistake can have fatal consequences. However, when I play chess, I can get away with making a less good move in the opening. I can correct the disadvantage later."

Besides that, innovation is something that should be done continuously to maintain leadership. Just as Eduard Punset⁸ highlights, the crisis we face today is not financial, but in lack of innovation. Spain is a country where there was no scientific revolution. Smart innovation never appears in a simple context. It

comes in a complex one. Hence a multiplicity of interactions between entrepreneurs, investors, and scientists. That is what miserably fails in Spain according to Punset. I can only agree with him.

Observing my various hypotheses in history which were later confirmed, they told me at the University of Murcia that I had a strong intuition. No doubt that the game of draughts and my draughts career in my childhood in Holland has been responsible for this virtue. Chess or checkers calculations exercise intuitive thinking. Intuition is the bright and direct perception of an idea. At the draughts or chessboard it is the immediate finding of the next move. Kasparov, a player who is not conscious of the process but its consequences, relates it to past experiences, but cannot explain how he discovered a new innovative move. Einstein said: "The only real valuable thing is the intuition." Chess and draughts develop the scientific thought. The mind generates many variants during a game. People explore and research new ideas in order to predict what will happen, and surprising revelations are interpreted. The next move is like a hypothesis and then they check it for validity. Garry Kasparov, analyzing the games of the great players of the past 200 years with the help of a computer, had found something unusually attractive.

These talented players often achieved their best and most innovative moves at the hardest moments of their chess battles, when they depended only on their innate intuition. Researcher and author Tony Bastick⁹ writes: "Intuition is a powerful human faculty, perhaps the most universal natural ability we possess". Finally there has been a vast amount of scientific research done to prove the existence and validity of intuition. The information overload that we experience daily in our businesses combined with less time for planning and development of new strategies and products means that decision-making is stressful with little time for analysis. Intuition is particularly suited to environments of rapid change where innovation

⁹ **BASTICK, Tony** (1982) *Intuition: How We Think and Act* (New York: John Wiley and Sons, Inc., XXIII

and creativity are encouraged to thrive. Successful visionary leaders rely on their intuition. Researchers have discovered that the higher up the corporate ladder a business leader progresses, the more he relies on intuition and 80% of successful CEOs have a highly developed intuitive decision-making style. The gifted scientist will usually develop a feel for his subject, which may not be substantially different from the intuition of which some historians boast.

The knowledge of intuition has made significant advances in recent years. I have always trusted my intuition in playing draughts, business, and history. Kasparov says Magnus Carlsen's mastery is rooted in a "deep intuitive sense no computer can teach" and that his pupil "has a natural feel for where to place the pieces". Chess intuition can be developed through deliberate practice of studying chess. I can say the same about the game of draughts, because I had a natural feel for where to place the pieces after having studied many positions and parties of the grandmasters. Taking into account my short draughts career in the sixties I thought it possible to intuitively find the author of *La Celestina*, provided that I studied most of the books and articles of *La Celestina* to gain experience. For that reason I read hundreds of books and articles about *La Celestina* between 2004 and 2009, hoping that intuition would help me.

Around 2005 my friend José Antonio Garzón Roger brought me into contact with a chess player in Zamora, Mr. Juan Antonio Ardila Bohorquez. This chess player told me by telephone that he was convinced that Francesch Vicent and Lucena were the same person. Garzón said that Ardila more or less stated what I had written in an article on the internet. I did not go as far that time, but my intuition indeed went in that direction.

On the other hand, Garzón was investigating the chess history of Francesch Vicent¹⁰ and saw strange things. He did not think that

¹⁰ **GARZÓN ROGER, José Antonio** (2001) *En pos del incunable perdido. Francesch Vicent: Llibre dels jochs partits dels schachs*, Valencia, 1495. Biblioteca Valenciana, Colección Bibliofilia, Valencia 2001

Lucena could have been Francesch Vicent. However, everything was going precisely in this direction, rather against his will or conviction. However, Garzón is a very good investigator who is only interested in the truth and its documentation.

The student Lucena claims to be the son of Juan Ramirez de Lucena, an ambassador of the Catholic Monarchs. He still had not obtained any degree and was studying at the University of Salamanca. Lucena wrote *Arte de Ajedrez* and *Repetición de amores* and from their contents we conclude that he was an expert in chess and had been to France and Italy.

José Antonio Garzón Roger had shown in the past that Lucena copied the chess book of Francesch Vicent. Years ago Garzón informed me that Ardila Bohórquez was convinced that Francesch Vicent and Lucena were the same person. Garzón told me that in this sense Ardila said roughly the same thing as I had said in my article on the internet. Garzón refers to this matter in his book¹¹:

My friends Govert Westerveld and Juan Antonio Ardila Bohórquez, who have helped me so much in this research, have suggested to me several hypotheses implying a direct link between Vicent and Lucena. The idea is convincing, for it would explain many things but until now it has not been backed up by any documents or proofs –we are forced to fathom these matters in the field of facts.

Garzón could never accept this idea and that was why I had to rectify my initial idea or intuition that was identical to that of Ardila Bohórquez - that Francesch Vicent was Lucena.

In a letter of the ambassador Juan Ramírez de Lucena¹² directed to king Ferdinand it became clear that the ambassador had several sons. If Lucena could not be Francesch Vicent, according to Garzón, then Lucena could be a pseudonym for Fernando de Rojas or Juan del Encina.

I adopted the latest possibility and saw Juan del Encina as Lucena and as an adopted son of the protonotary. All of this is explained in the four books I wrote about *La Celestina* under a pseudonym.

However, I could not be satisfied with my work, because researchers of *La Celestina* stated many times that an Aragonese¹³ writer must have participated. Of course, I was then always thinking of Francesch Vicent, but how to prove that? Consequently it was necessary to find out the activities of Francesch Vicent in Italy. May he have been working under the name of Lucena in Italy? I did not think so seeing the problem his family had with the inquisition. Maybe there was somebody in Italy who worked in the printing houses of Venice and Rome whose biography was still veiled in mystery. Lucena¹⁴ must have been a man of money and an influential person related to Ferrara, the people of Urbino, Rome, and if possible somebody who had to do with chess and the papal court. Briefly put, a man who moved in the same circles as Francesch Vicent.

One thing is clear - the name Lucena disappeared and we find it back in France in some chess manuscript and that is all. The same happened with Francesch Vicent. His name disappeared and the only

thing we know is that he was a chess master of Lucrecia Borgia in 1505 in Ferrara and after that date we do not know anything about him. It is thus clear that Francesch Vicent must have used another name in Italy to make a living. Let us call him Mr. X and ask the following questions:

What is Mr. X's connection with chess?

If Mr. X is Lucena or Francesch Vicent, are there other chess manuscripts in this style?

Does Mr. X have connections with people in Ferrara?

Is there a connection between Mr. X and Juan Ramírez de Lucena?

Did Mr. X have printing experience?

What is the connection of Mr. X and authors of books?

What was Mr. X's relationship with Isabel del Este?

What is Mr. X's relationship with Gentile Feltria?

Is there a connection between Mr. X and Venice in the early 15th century?

What was Mr. X's relationship with Luca Pacioli?

What is Mr. X's relationship with Baldassare Castiglione?

Was Mr. X an important personage in Rome?

With all these details in mind I suddenly found such person in 2012 and most interesting was the fact that before 1508 nobody knew

about his life and that he used in his name the letters “Vicent” and had a connection with chess and his first name disclosed the first name of Lucena: Ludovico¹⁵. This new research resulted in a new book¹⁶ that was published some time ago and another new book¹⁷.

In that time, in 2013, I also obtained from the research scientist Michael Ryan a version of JGAAP 7 (Java Graphical Authorship Attribution Program) of the Duquesne University, because I had serious problems with JGAAP 6.

In the meantime I wrote in English the biography of the ambassador Juan Ramirez de Lucena and it is now time to write the biography of Lucena. This ofcourse, is not easy because we do not know till now who is really Lucena. Was he Juan del Encina? Was he Fernando de Rojas or was he Francesch Vicent? Finally JGAAP gave me the solution, because the letter of Juan Ramírez de Lucena directed in 1503 to King Ferdinand was not written by him but by his son Lucena, the author of the *Repetición de amores*.

Years ago I was convinced that Francesch Vicent and Lucena were the same person. Notwithstanding this I rectified my original idea and gave up this possibility in 2006. However, all those years I tried to obtain more proofs for this thesis and now thanks to the program JGAAP we are coming in the right direction.

Today, thanks to JGAAP, I again hold the opinion that Lucena is the pseudonym of Francesch Vicent. So I changed Juan del Encina (Lucena) for Francesch Vicent (Lucena). I will no longer use Lucena

¹⁵ **WESTERVELD, Govert** (2017). Luis de Lucena was the real name for the nickname “Lucena”. Estudios Humanísticos de Blanca, 2017, N° 27, pp. 1-31. (Working paper in www.researchgate.net). DOI: 10.13140/RG.2.2.18043.92964

for Juan del Encina, because the person in question is now Francesch Vicent, an illegitimate son of Juan Ramirez de Lucena. I still consider Fernando de Rojas to be an (illegitimate) son of the protonotary Juan Ramirez de Lucena, but won't call him Lucena either, although I still believe that he could have been another illegitimate son of the prothonotary, because there was a close contact between Francesch Vicent (Lucena) and Fernando de Rojas, seeing the books the latter had in his library. For me Juan del Encina continues to be one of the main authors of *La Celestina*. With respect to the main title¹⁸ in my four books written between 2006 and 2009 JGAAP does not confirm that Juan Ramírez de Lucena could have been an author of *La Celestina*. On the contrary, the situation of JGAAP and other linguistic proofs has been enlightened for the text by *Juan del Encina (alias Bartolomé Torres Naharro and Francisco Delicado)*.

Here JGAAP and other linguistic proofs confirm that the texts of the book *Propalladia* by the pseudonymous author Bartolomé Torres Naharro are mainly written by Juan del Encina and Francesch Vicent (Lucena). The foreword to the book seems to be by Francesch Vicent (Lucena). So now the question is who printed *Propalladia* in Naples. Was it Lucena or was it Juan del Encina? I think that it was Lucena, because he had the money. We see something similar in *Lozana andaluza*, but here is Lucena again involved in the printing; this time under the pseudonym Francisco Delicado.

Most of the texts seem to have been written by Juan del Encina and most of the additional texts were also written by him and probably a small part of the book by Lucena. However, historians say that the

¹⁸ **VALLE DE RICOTE, Gofredo** (2006-2009) *Los tres autores de La Celestina: El judeoconverso Juan Ramírez de Lucena, sus hijos Fernando de Rojas (Lucena) y Juan del Encina (alias Bartolomé Torres Naharro y Francisco Delicado)*. Four volumes

book is written by Francisco Delicado¹⁹. As explained hereafter, Francisco Delicado is Lucena and Lucena did not write all the text of *Lozana Andaluza*, according to JGAAP. However, we must understand that JGAAP is still not 100% trustworthy. JGAAP is only one aid more in the history, but cannot be used as the main research tool. Thus we need additional linguistic proofs, such as those supplied in this book.

In this study I will indicate the ranking of the five most important authors who could be considered the authors of an anonymous work. Apart from his name I will also mention the book of which the texts are in the database. Sometimes no books were available, so I had to help myself with parts of testaments, poems, and other texts.

Since it was a custom in the 15th and 16th century to seize texts of other authors and edit them under one's own name, I have been careful with texts and forewords. The forewords could have been written by the editor of the work and its texts by the real author. JGAAP indicates that Francisco Delicado has the authorial fingerprint of Lucena in case of two Italian books: *El modo de adoperare el legno de India occidentale* and *Specchio vulgare per li Sacerdoti*. With regards to *Lozana Andaluza* JGAAP favours Lucena as the author of some texts, but indicates Juan del Encina as the author of other texts. We have to be very careful with the author of the texts and forewords of any book, because they can be done by two authors. The text of the book *Propalladia* is according to JGAAP in some cases Juan del Encina's and in other cases Lucena's, but the foreword is solely Lucena's!

After having explained the usefulness of the JGAAP program in this book we come to the conclusion that Diego de San Pedro and Juan de Flores are pseudonyms of Francesch Vicent (Lucena). With regards to *La Celestina* we will observe in this book that the first six

¹⁹ WESTERVELD, Govert (2017) *The Life of Francisco Delicado in Rome: 1508-1527*. Academia de Estudios Humanísticos de Blanca. Lulu editors. ISBN: 978-1-326-81436-6 - 276 pages

chapters could have been written by Francesch Vicent (Lucena) and that most of the other chapters were the work of Juan del Encina, probably with the help of Lucena, as other linguistic methods prove.

Why this interest of Francesch Vicent (Lucena) to constantly use other pseudonyms? We must understand that the Jews were highly persecuted. Thus we see that under the Spanish crown there are witnesses of progressive deterioration of the situation with the Jews that would culminate in a definitive expulsion of the entire Kingdom of Naples in 1541. The presence of King Ferdinand the Catholic in the city of Naples from 1506 to 1507 exacerbated this situation: he wanted to impose a distinctive sign of red cloth on the Jews that had to be worn on their chest, in addition to striving for his expulsion - a measure which the great Captain opposed, alleging reasons of economic nature. Fray Francesco de l'Angelina requested to impose a yellow cap on the Jews of the Kingdom, as was the case in Venice. The anti-Jewish measures took effect and on April 28 1521 - a decree was issued imposing the yellow cap on the Jews of the Kingdom²⁰. Logically, some Jews, including Francesch Vicent (Lucena), took their measures.

Let me give you an idea on intuition and JGAAP. Seeing the translating and printing activities of Lucena, my intuition told me that Lucena could have been involved in the translation of other Italian books and so I studied the books in relation to Ferrara and the years 1505, 1506, 1507, and 1508. Suddenly I saw that there was the book *Il Peregrino* coming from Ferrara in 1508 and that it was translated into Spanish by a man by the name of Hernán Díaz resident at the University of Salamanca. That was rather strange and I could not believe it. Then I read that he was connected to the

University of Salamanca and this was quite suspicious, because he was saying the same as in his books *La Celestina*, *Flores Romanas*, *Propaladia*, and *Lozana Andaluza*. Seeing that little was known about Hernán Díaz it was clear that this author could be Francesch Vicent (Lucena), because as we know, Francesch Vicent was in Ferrara in those years. This was confirmed by JGAAP and other linguistic proofs thanks to the research of Dr. Rolf Eberenz.

Ounce scholars can confirm my findings that Hernán Díaz is indeed a pseudonym of Francesch Vicent (Lucena), we will be on the right path to accepting that Lucena could have used more pseudonyms to remain elusive to the Spanish Inquisition.

1 The Work “*Arcadia*” according to JGAAP

1.1 Introduction

Attribution of authorship is a long-standing problem in text analysis, and indeed in the humanities in general. JGAAP *is* software designed for textual analysis, categorization, and attribution of authorship. The JGAAP 5.1 User Guide gives a method for textual analysis. JGAAP relies on an authorship attribute database to find out who wrote a given text. This is called “closed class” attribution. It heavily relies on a number of various author stylometric definitions to provide the researcher with an accurate answer²¹.

The method described in the User Guide of JGAAP 5.1. is:

1.2 Who is the author of the work *Arcadia*?

Diego Hurtado de Mendoza y Pacheco (1504-1575) was the son of Íñigo López de Mendoza y Quiñones and Francisca Pacheco. He was a Spanish diplomat, historian, poet, novelist, and governor of Granada. In 1539 he was appointed ambassador at Venice. He acted for some time as military governor of Siena, diplomatically represented Spain at the Council of Trent, and in 1547 was nominated special plenipotentiary at Rome, where he remained till 1554.

²¹ **JUOLA, Patrick** (2009) *JGAAP: A System for Comparative Evaluation of Authorship Attribution*. In: JDHCS 2009, Volume 1 Number 1, pp. 1-5

In the Eternal City Luis de Lucena attended the Academy of Virtuosi²² supported by Cardinal Domenico Grimani, a great friend of Erasmus of Rotterdam. This study formed one of the heterodox circles that were active in Rome at that time. Another outstanding group of intellectuals in the circle of Viterbo were: Sepulveda, Paez de Castro, the ambassador Diego Hurtado de Mendoza (1503-1575), cousin of the Duke of the Infantado, and with all of them Luis de Lucena²³. Diego Hurtado de Mendoza was Ambassador in Venice from 1539 to 1545. Thereafter he was Ambassador in Rome (1547-1553). Both Diego Hurtado de Mendoza and Luis de Lucena were collectors of coins²⁴.

Truman²⁵ states that on 5 September 1548 a letter was published with the title *Historia de los Successos de la Guerra che la Magestad del Invitissimo Don Carlos Emperador de los Romanos, y Rey de España, y Alemania, hizo contra los príncipes, y Ciudades rebelde de Alemania, y del fin que tuuo*. The author was Pedro de Salazar. Since the XVI century scholars were of the opinion that Diego Hurtado de Mendoza wrote the letter *Carta del Bachiller de Arcadia, y respuesta del capitán Salazar*. They had a good reason for thinking that, because in the letter the Bachiller writes: “A mí me vinieron a la boca todos estos disparates oyendo leer vuestro libro en casa del Embajador”. Moreover the letter finished with the following words:

Mi nombre hallaréis firmado aquí debajo. Si por él no me conociédes, no curéis más dello. Basta que si quisieredes responder, lo podréis hacer

encaminando vuestras cartas á Roma, sobreescritas al Bachiller, en manos del Señor Don Diego de Mendoza, nuestro Embajador, que Su Excelencia tendrá cuidado de enviármelas. Pero tornóos á avisar que miréis por el virote y juguéis limpio y no de llano, pues no hay por qué dejemos de ser amigos. Vuestro amigo — El Bachiller.

With this information we now have a perfect opportunity to test the validity and effectiveness of the JGAAP program if the work *Arcadia* was indeed written by Diego Hurtado de Mendoza.

To see our way of making the analysis please consult the chapter 2 „JGAAP Program and the Work *Arnalte y Lucenda*”.

We applied the Character NGrams n:1, n:2, n:3, n:4, and n:5 in our five analyses and the results were the following:

Is Diego Hurtado de Mendoza the author of the work *Arcadia*?

In the table above we have used the highest position of each author obtained in an analysis. Some authors did write various books, but we have only used their name once in each analysis. On the other hand the first author in each analysis received 5 points and the last one only 1 point. In this case the analysis of the letter did not create many complications and it is clearly visible that Diego Hurtado de Mendoza was the author of the letter “*Arcadia*”.

1.3 Who is the author of a letter to Feliciano de Silva?

However, the analysis of the following letter of Diego Hurtado de Mendoza addressed to Feliciano de Silva proves far more problematic to detect with JGAAP that he was the author:

CARTA DE D. DIEGO DE MENDOZA, EN NOMBRE DE MARCO AURELIO, Á FELICIANO DE SILVA.

Marco Aurelio, oriundo de los ensalzados montes que sus siete cabezas sobre las altas cumbres de la redondez del universo con mayor acrecentamiento y grandeza de sus profundas mares, para que con ella sus fuerzas á los inmortales Scitas, Getas y colorados Etiopes con doblada alquimia de sus militares guerreros el resonante eco de sus hazañas se extienda; á tí, el caballero Feliciano de Silva, domador de las inmortales palabras, acrecentador de la castellana lengua, para que con sus riquezas y mercaderías los retazos de sus añadiduras y menudos trapos con diversas colores y remiendos, como calcetero, la inmortal bragueta de que las defectuosas carnes carecen henchida sea, desea salud, para que con ella el número de tus nunca acabadas obras se acreciente, y risa y aliento á los leyentes para tus inmortales encarecimientos viva.

En el tiempo que el tostador y caluroso Febo las sus partes de la concavidad celestial andadas, sudores y desalentados descansos á los hombres carnosos y pingosos apareja; cuando la consumidora barriga y rugientes tripas, habiendo en sí recibido los ventosos ahitos de la pasada noche, corrompiendo los aires con innumerables truenos y dislates, á los manjares de la mañana hacen lugar, para que en los arrugados estómagos con las remanientes indigestiones se aposenten; y cuando las chicharrantes cigarras por las picadoras cambronerías

celebran sus acostumbrados cantos; y cuando los zumbadores tábanos fatigan con sus chupadoras trompas los animales brutos, y derramando su sangre dellas, grandes coces y patadas é innumerables temblores de cuero y de persona producen, sonando con sus coces los pendientes estribos de las arropadas sillas ó enjergadas albardas, causan melodía el sonido de sus cueros ó patas en las orejas de quien escucha; y cuando las bramantes vacas con sus garañones toros, ensalzadas las banderas de sus amosqueadoras colas, por los campos de su deleite vienen huyendo de la enemiga moscarda, y cucadas por el aguijón, aguijan, y aguijadas por el cuco, cucan; estando yo en las escuridades de mi rígido aposento, haciendo las lumbrosas ventanas matizadas vislumbres con sus medio cerradas ventanillas á manera de saetera, porque los altera la saetera produce aquella luz que por el Maestro de la luz le fué dada, y la ventanilla con la fuerza de la fuerza del que la cierra está en su voluntad proporcionada la cantidad de luz, fueras ende si las pungidas y jacintadas orinas, producidas por el incontinente meador por falta de vidriosos orinales en sus tornantes goznes, comunicadas con el polvo que las perezosas mozas por la ventana de su basura lanzan con aljofaradas gotas, á manera de argamasa, se endurecen; allí me venían varios pensamientos con la solenidad de los bullidores ratones, que, con el desatino de las roncas voces y pesados pantuflazos, pierden el tino de las cavernas donde primero salieron; allí las importunas moscas; allí los rebuznadores borricos; allí las saltadoras pulgas, las amoretadas chinches, los tardos y prolongados piojos, las escaleradas cucarachas, las penosas arañas y los negros escarabajos me ocurrían, venciendo su música armonía con su acordado artificio los puntos de los puntos de las hinchadas trompetas y tiznados herreros.

Bien que por la diferencia de sus movimientos conociese yo el desvarío de sus calidades, decía yo entonces conmigo mismo: — ¡Oh inmortales dioses! ¡Oh soberano ayuntamiento de cosas, para que con su grandeza la grandeza vuestra por parte de tan pequeñas cosas comunicada nos fuese! ¿Por qué consintió vuestra deidad que de mí en ellos, de ellos en mí, como de mí á mí para con ellos mis pensamientos los encerrasen? ¡Oh bienaventurada variedad que tales cuidados producir pudiste! ¡Oh bienaventurados pantuflazos, que con vuestras duras suelas á los tales animales acertar pudisteis! ¡Oh bienaventurada sala donde tales sabandijas se conciben! ¡Oh bienaventuradas peticiones, que los Procuradores de sus audiencias apacientan con sus desvariadas respuestas fuera de los espesos polvos de Valladolid, y bienaventurado tú, que pudiendo hacer libro hiciste razonamiento, y de razonamiento hiciste Apocalipsi, como los correosos agujeteros, que si la blanda agujeta, con estrechez de su forma angosta se les representa para los deleznables cerraderos de las hambrientas bolsas, á manera de tomiza las rodean! ¡Ay de mí, que no hay en mí tal industria de sentimiento para sentir la industria de tu industria con la falta de mi falta, que com prendiese la sobra de tu habilidad, la cual si, por tus innumerables é infinitas razones,

comunicada me fuese, quedaría yo como aquéllos que para la salud de las importunas tercianas y locas y soñolientas modorras y contagiosas garganterías y triparías y landres el ingenio de su doctrina en los generales estudios apacientan; y si no como éstos, ya que no alcanzando á éstos, más corto que éstos me tuviese, á lo menos con los repicadores boticarios, que con la melodía y retinte de sus almireces las inmortales moradas del dios Eolo, con quien confinan, hasta las bóvedas de sus promontorios atruenan. Y ya que mi ventura la tal alteza me negase, ¿quién me quitaría que con los corredores caballos y cargadas acémilas y tardos borricos la administración de las medicinas participada por mí no fuese, de suerte que si no médico, boticario; si no boticario, albéitar, por la comunicación de las ensalzadas ondas y furiosos vientos de tal estilo, á mí, tu menor siervo, tal beneficio se concediese, en cuya fee á manera de cherrien en pequeño espacio la carga de las sufridoras mulas en mis hombros con las ruedas de tus avisos tiraría?

Y así acabo comunicándote aquella paz que tú á los que tus inmortales cláusulas con su repugnancia tarda comunicas, para que en tí con ellos y ellos sin ellos hagan más remontado principio á mayores ayuntamientos de razones.

Marco Aurelio, á tí, Feliciano, salud y paciencia para los que leen tus obras, una siesta, estando yo en mi aposento pensando en las sabandijas del verano, tomé dellas ocasión para desear poder imitar en algo tu estilo.— Vale.

Is Diego Hurtado de Mendoza the author of a letter directed to Feliciano de Silva?

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |
|-------------------------------|-----|-----|-----|-----|-----|-------|
| Juan Ramírez de Lucena | 3 | 5 | 2 | 4 | 4 | 18 |
| Diego Hurtado de Mendoza | 4 | | 3 | 5 | 5 | 17 |
| Alonso de Proaza | 5 | 1 | 4 | 2 | 1 | 13 |

| Francisco López de Villalobos | 2 | 3 | 1 | | | 6 |
| Lucena | 1 | | | 1 | 2 | 4 |
| Juan del Encina | | 2 | | | | 2 |

In this example we observe that the letter has more the writing style of Juan Ramírez de Lucena. We only know that the letter could have been from Diego Hurtado de Mendoza, because Juan Ramírez de Lucena died around 1504 and could never have been the author. Facts such as these can occur with other authors that live more or less in the same period. In other words, an author that ends in the first place does not always guarantee that he in fact was the author of a work. We must take other factors into account, such as time, place, habits, travelling, position, etc.

1.4 JGAAP analysis alone is not enough

JGAAP is a very helpful program, but using it is not enough to be sure that the results are 100% reliable. For that reason we need additional proofs, such as studies by other researchers and certain words frequently used by the author.

Let's suppose that we think that the author Hernán Núñez de Toledo²⁶, “The Greek Commander”, is a pseudonym and we want to investigate whether he has something to do with the Lucena clan. We do an analysis with JGAAP that indeed shows that Lucena is the author of the book *Las Trescientas*,

Who is the author of the work *Las Trescientas*?

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |
|-------------------------|-----|-----|-----|-----|-----|-------|
| Lucena | 5 | 5 | 5 | 4 | 5 | 24 |
| Juan Ramírez de Lucena | 2 | | 4 | 3 | 4 | 13 |
| Fr. López de Villalobos | 3 | 4 | | | 3 | 10 |
| Fernando de Rojas | | 3 | 3 | 2 | 1 | 9 |
| Lucas Fernandez | 1 | | | 5 | 2 | 8 |
| Alonso de Proaza | 4 | 1 | 1 | 1 | | 7 |
| Juan de Flores | | 2 | | | | 2 |
| Juan del Encina | | | 2 | | | 2 |

Seeing this table we could think that Lucena is the real author and that Hernán Núñez de Toledo is an impostor. Seeing Juan Ramírez de Lucena in the second place is rather strange, as we would sooner expect to see Juan de Flores or Diego de San Pedro.

In this case we know that Hernán Núñez de Toledo was a real author and that the text was indeed his. However, if we do not know this, it is

²⁶ **NADER, Helen** (1978) *The Greek Commander Hernán Núñez de Toledo*. In: *Renaissance Quaterly* 31, pp. 463-485

necessary to obtain additional proofs. One of the proofs can for example be whether the words *tendr...* and *vendr...* are used in his work. If this is the case, we can be sure that we have a connection to Lucena. If this is not the case, we can forget Lucena or need additional proofs. It is clear that we have to be extremely careful with our opinion before definitively naming somebody as the author.

1.5 Conclusion

According to this rudimentary method of JGAAP it appears that Diego Hurtado de Mendoza was indeed the writer of these letters of *Arcadia* and *Feliciano de Silva* when we apply the Character NGrams $n:1$, $n:2$, $n:3$, $n:4$, and $n:5$. In each case we will find the name of Diego Hurtado de Mendoza and the more repetitions of his name we see in the analyses of $n:1$, $n:2$, $n:3$, $n:4$, and $n:5$, the more possibilities exist that Diego Hurtado de Mendoza was indeed the author of these letters.

Although JGAAP is a suitable program for finding possible authors, other tests and proofs are necessary to come to a reliable result.

The details of the corresponding results are all to be found in the Appendix to chapter 1.

2 JGAAP Program and the Work *Arnalte y Lucenda*

JGAAP is quite an interesting program, but it is still not perfect. On the other hand we do not consider ourselves experts in using this program. Although our way of working has its doubts, some conclusions can be made with JGAAP used for identification of authorship. However, this program has its limitations and so we have to be careful in accepting what the program points at. It is necessary to find additional proofs to be sure of the findings of JGAAP.

2.1 JGAAP and Authorship Attribution

Authorship Attribution is a long-standing problem in text analysis, and indeed in the humanities in general. Law enforcement and forensic scientists are interested in these methods; Chaski reports on a court case where a body was discovered near a computer with an apparent suicide note typed into it. In case of a hand-written note, of course, handwriting specialists could be called in to verify that the note was in the handwriting of the deceased, but one flat-ASCII 'A' looks identical to any other. What was needed instead was an analysis based on writing style, and Chaski was able to prove that the deceased did not write the note, and a murder had been committed²⁷.

The JGAAP authorship identification tool can help us compare texts by writers known to us from the 15th-16th century with the texts that we possess by unknown authors. We have to rely on the well-tested assumption that people have a distinct way of writing. The characteristics manifest themselves in how writers use words, spell

²⁷ **JUOLA, Patrick** (2009) *JGAAP: A System for Comparative Evaluation of Authorship Attribution*. In: JDHCS, Volume 1, Number 1, pp. 1-5

certain words, structure sentences, and through many other individualities.

2.1.1 How to use JGAAP

Using JGAAP we formed a database of at least 50 authors known to us from the 15th-16th century. We used a text of about 5,000 words by each writer. With respect to the authors unknown to us we tried to use the text of an unknown author of a minimum of 500 words. However this is not always possible. We must also understand that the 5,000 words by an author could not always be 100% by the author. Authors in those times had the habit of copying texts of other writers and it will be clear to the lector that in such case the pattern is not 100% pure.

According to the user guide of JGAAP 5.1. one has to work in the following way:

| | |
|------------------|---|
| Canonicizers: | Normalize Whitespace - Normalize ASCII |
| Event Drivers: | Character NGrams N: 4 (others ²⁸ use NGrams N: 2) |
| Event Cullers: | Most Common Events N: 50 |
| Analysis method: | Nearest Neighbor Driver with metric Cosine Distance |

2.1.2 The results with JGAAP

To test the efficiency of the JGAAP program we did a test of 473, 781, 1839, and 2687 words and another one of 3,470 words of the book *Arnalte y Lucenda*. Thanks to the test we can see the behaviour and results of the author Diego de San Pedro in the various tables. We can also find out whether *Arnalte y Lucenda* would indeed have the same linguistic characteristics as *Cárcel de amor*²⁹. We applied the

Character NGrams n:1, n:2, n:3, n:4, and n:5 in our five analyses and gave 5 points to number 1, 4 points to number 2, 3 points to number 3, 2 points to number 4, and 1 point to number 5. The results were the following:

Which authors of the text of 473 words are similar to the author of the book *Arnalte y Lucenda*?

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |
|----------------------------------|------------|------------|------------|------------|------------|--------------|
| Lucena | 5 | 4 | 5 | 5 | 4 | 23 |
| Juan de Flores | 4 | 5 | 1 | | 3 | 13 |
| Juan del Encina | | 1 | | 4 | 5 | 10 |
| Hernán Díaz | 1 | | 3 | 3 | | 7 |
| Diego de San Pedro | 3 | 2 | | | | 5 |
| Alonso de Proaza | | | 4 | | | 4 |
| Luis de Lucena | | | 2 | | | 3 |
| Alonso Núñez de Reinoso | | 3 | | | | 3 |
| Juan de Timoneda | 2 | | | | | 2 |
| Fernando de Rojas | | | | 2 | | 2 |
| Francisco Delicado | | | | | 2 | 2 |
| Hernando del Castillo | | | | 1 | | 1 |
| Carajicomedia Francisco Delicado | | | | | 1 | 1 |

As we can see in the table of the various test methods with the Character NGrams n:1, n:2, n:3, n:4, and n:5, Diego de San Pedro comes in the fifth place, because the texts of 473 words have more linguistic characteristics of Lucena who occupies the first place. Therefore we did another test with 781 words.

but this is not easy to prove. We consider Diego de San Pedro to be a pseudonym, not the real name of the author.

Which authors of the text of 781 words are similar to the author of the book *Arnalte y Lucenda*?

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |
|-------------------------------|------------|------------|------------|------------|------------|--------------|
| Juan de Timoneda | 4 | 5 | 4 | 3 | 3 | 19 |
| Hernán Díaz | | 4 | 5 | 5 | 4 | 18 |
| Lucena | | 2 | 3 | 4 | 5 | 14 |
| Diego de San Pedro | 5 | 3 | 1 | 2 | 1 | 12 |
| Feliciano de Silva | 2 | | | 1 | 2 | 5 |
| Luis de Lucena | | 1 | 2 | | | 3 |
| Diego Hurtado de Mendoza | 3 | | | | | 3 |
| Francisco López de Villalobos | 1 | | | | | 1 |

In this table we see that Diego de San Pedro now occupies the fourth place and the first place is occupied by Juan de Timoneda. More words are necessary to find out the real position of the book *Arnalte y Lucenda*. Therefore we did a test with 1,839 words, which corresponds to about 11kb.

Which authors of the text of 1839 words (11kb) are similar to the author of *Arnalte y Lucenda*?

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |
|----------------------------------|------------|------------|------------|------------|------------|--------------|
| Lucena | 3 | 3 | 4 | 4 | 5 | 19 |
| Hernán Díaz | | 5 | 5 | 5 | 3 | 18 |
| Diego de San Pedro | 5 | 4 | 3 | | | 12 |
| Feliciano de Silva | | 1 | 2 | 3 | 4 | 10 |
| Juan de Timoneda | 4 | 2 | | 2 | | 8 |
| Diego Hurtado de Mendoza | 2 | | 1 | | 1 | 4 |
| Francisco López de Villalobos | 1 | | | | 2 | 3 |
| Carajicomedia Francisco Delicado | | | | 1 | | 1 |

We still do not see Diego de San Pedro in the first place. Lucena occupies it again and we observe Hernán Díaz in the second place. This gives us enough reasons to suspect that Lucena and Hernán Díaz

are pseudonyms for an author who does not want to state his real name. Since we were still not satisfied with the obtained results we tested 2,687 words, which corresponds to 16kb.

Which authors of the text of 2687 words (16kb) are similar to the author of *Arnalte y Lucenda*?

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |
|-------------------------------|------------|------------|------------|------------|------------|--------------|
| Diego de San Pedro | 5 | 5 | 4 | 3 | 5 | 22 |
| Hernán Díaz | | 4 | 5 | 5 | 3 | 17 |
| Lucena | 4 | 3 | 3 | 1 | | 11 |
| Juan de Timoneda | 3 | 2 | 1 | 2 | | 8 |
| Feliciano de Silva | | | 2 | | 4 | 6 |
| Francisco Delicado | 1 | | | 4 | | 5 |
| Francisco López de Villalobos | 2 | | | | 1 | 3 |
| Alonso Núñez de Reinoso | | 1 | | | 2 | 3 |

Finally we see Diego de San Pedro in the first place and Hernán Díaz in the second one. We still do not consider the results satisfactory, because we wanted to see that *Arnalte y Lucenda* would appear in the first place in all the tests (n:1-n:5). Therefore we tested 3,470 words, which corresponds to 21kb.

Which authors of the text of 3470 words (21kb) are similar to the author of *Arnalte y Lucenda*?

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |
|-------------------------------|------------|------------|------------|------------|------------|--------------|
| Diego de San Pedro | 5 | 5 | 5 | 5 | 5 | 25 |
| Lucena | 4 | 3 | 4 | 4 | 3 | 18 |
| Hernán Díaz | | 4 | 3 | 2 | 1 | 10 |
| Juan de Timoneda | 3 | 2 | 1 | 1 | | 7 |
| Feliciano de Silva | | | 2 | 3 | 2 | 7 |
| Francisco López de Villalobos | 2 | | | | 4 | 6 |
| Francisco Delicado | 1 | | | | | 1 |
| Alonso Núñez de Reinares | | 1 | | | | 1 |

This time the results are satisfactory and we see that Diego de San Pedro occupies the first place in all the tests (n:1-n:5). Lucena, a pseudonym for an author, was probably also the author of *Arnalte y Lucenda* and *Cárcel de amor*.

This in accordance with Luis Miguel Vicente who saw Diego de San Pedro's work *Cárcel de amor* have an influence on *La Celestina*³⁰. The same can be said about the study of José Luis Varela³¹ who also observed the influence of *Cárcel de amor* on *La Celestina*. Even Marquez Villanueva³² saw this influence, but his most important point is that he mentioned the name Juan Ramírez de Lucena.

Returning to our tables, for that reason we always apply 21kb of a work to a test with the JGAAP program if possible. Unfortunately this is not always possible and we sometimes have only short texts at our disposal. It is clear that the name of the author of a work should appear even in short tests. This can be in the text of the book or in the foreword. When the author does not appear in the text of the book with the n:1-n:5 analysis, it means that the author did not write the book, but is using the text of another author or translator. Normally in such case the author appears in the foreword.

An example of that is the work *La Vida y excelentes dichos de los mas Sabios Filósofos que uvo en este mundo* (1520) whose author is Hernán Díaz. We know that the work *Libro de los honestos amores de Peregrino y Ginebra* was written by Hernán Díaz, but was he really the author of *La Vida y excelentes dichos de los mas Sabios Filósofos que uvo en este mundo*?

Is Hernán Díaz the author of the 747 words of *La Vida y excelentes dichos de los mas Sabios Filósofos que uvo en este mundo*?

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |
|-------------------------------|------------|------------|------------|------------|------------|--------------|
| Francisco López de Villalobos | 5 | 5 | 5 | | 3 | 21 |
| Juan del Encina | 4 | 3 | 4 | 5 | 1 | 17 |
| Alfonso de Valdes | | 4 | 2 | 1 | 5 | 12 |
| Lucena | 1 | 2 | | 4 | 2 | 9 |
| Diego Hurtado de Mendoza | | | 1 | 3 | 4 | 8 |
| Luis de Lucena | | | 3 | 2 | | 5 |
| Alonso de Cardona | 3 | | | | | 3 |
| Juan de Flores | 2 | | | | | 2 |
| Alonso de Proaza | | 1 | | | | 1 |

We only had 747 words at our disposal and as we have seen in the case of *Arnalte y Lucena* and its author Diego de San Pedro in the fifth place, something similar ought to occur now in this text. Thus in the short text of 747 words the name of Hernán Díaz has to appear as author, because the quantity of 747 words was sufficient for that purpose.

However, this is not the case and we cannot find any trace of Hernán Díaz in this work. The text of the book was not by Hernán Díaz, but he took it from somebody else. Was it Francisco López de Villalobos or Juan del Encina? The situation is different in the foreword of *La Vida y excelentes dichos de los mas Sabios Filósofos que uvo en este mundo*.

Is Hernán Díaz the author of the foreword of 473 words of *La Vida y excelentes dichos de los mas Sabios Filósofos que uvo en este mundo*?

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |
|-------------------------------|------------|------------|------------|------------|------------|--------------|
| Alonso de Proaza | 3 | 4 | 5 | 3 | | 15 |
| Hernán Díaz | 5 | | 2 | 4 | | 11 |
| Feliciano de Silva | | | | 5 | 5 | 10 |
| Juan de Flores | | 5 | 4 | | | 9 |
| Lucena | | 2 | | 1 | 4 | 7 |
| Juan del Encina | 4 | | | 2 | | 6 |
| Luis de Lucena | | | 3 | | 2 | 5 |
| Francisco López de Villalobos | 1 | 3 | | | | 4 |
| Francisco Delicado | | | | | 3 | 3 |
| Diego Hurtado de Menodza | 2 | | | | | 2 |
| Alfonso de Valdes | | 1 | | | 1 | 2 |
| Alonso Núñez de Reinoso | | | 1 | | | 1 |

As we can observe from this short text, Hernán Díaz could perfectly have been the author of the foreword since he comes in the second place. Fortunately we have the full text of 1,164 words of the foreword at our disposal and the results are:

Is Hernán Díaz the author of the foreword of 1164 words of *La Vida y excelentes dichos de los mas Sabios Filósofos que uvo en este mundo*?

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |
|-------------------------------|------------|------------|------------|------------|------------|--------------|
| Alonso de Proaza | 3 | 3 | 5 | 4 | | 15 |
| Hernán Díaz | 5 | | 4 | 5 | | 14 |
| Lucena | 2 | 2 | | 3 | 5 | 12 |
| Juan del Encina | 4 | | 3 | 2 | | 9 |
| Juan de Flores | 1 | 5 | 1 | | | 7 |
| Feliciano de Silva | | | | 1 | 4 | 5 |
| Francisco López de Villalobos | | 4 | | | 1 | 5 |
| Luis de Lucena | | | 2 | | 2 | 4 |
| Alfonso de Valdes | | 1 | | | 3 | 4 |

In this table we see that the positions of Hernán Díaz and Lucena become stronger. It is clear that Hernán Díaz (Lucena) was involved in the book.

Since we suspected that Diego de San Pedro is a pseudonym for Lucena and can say the same about some works of Cristóbal de Villalón which we deem to be another pseudonym of Lucena, we wanted to see the influence of the works of Cristóbal de Villalón on the poem “*las siete angustias de Nuestra Señora*” from the work *Arnalte y Lucenda*. It appears that in another test, including the books of Cristóbal de Villalón as the possible author, there is indeed a relationship between these two pseudonyms. As we know Villalón wrote several books.

Who could be the author of the poem of 1128 words of “*las siete angustias de Nuestra Señora*” of the work *Arnalte y Lucenda*?

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |
|-----------------------|-----|-----|-----|-----|-----|-------|
| Villalón - Mirrha | 5 | 5 | 5 | 1 | 1 | 17 |
| Alonso de Cardona | 3 | 4 | 4 | 5 | | 16 |
| Villalón - Crotalon | 2 | 2 | 3 | 2 | 5 | 14 |
| Villalón - Provechoso | 4 | 3 | 2 | | 3 | 12 |
| Diego de San Pedro | | | 1 | 4 | 4 | 9 |
| Alonso de Proaza | 1 | 1 | | 3 | | 5 |
| Lucena | | | | | 2 | 2 |

We tested the same test, but now with a text of 3,470 words (21kb) that should give us the purest results:

Which authors of the text of 3470 words (21kb) are similar to the author of *Arnalte y Lucenda*?

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |
|-------------------------------|------------|------------|------------|------------|------------|--------------|
| Diego de San Pedro | 5 | 5 | 5 | 5 | 5 | 25 |
| Lucena | 4 | 3 | 4 | 4 | 2 | 17 |
| Hernán Díaz | | 4 | 3 | 1 | | 8 |
| Francisco López de Villalobos | 3 | | | | 4 | 7 |
| Villalón - Crotalon | | | 1 | 3 | 3 | 7 |
| Juan de Flores | 2 | | | 2 | | 4 |
| Alonso Núñez de Reinares | 1 | 2 | | | | 3 |
| Villalón - Mirrha | | 1 | 2 | | | 3 |
| Villalón - Turquía | | | | | 1 | 1 |

Again we see Cristóbal de Villalón, which is an indication that some of his books in fact could have been written by Lucena and that the name Cristóbal de Villalón could be a pseudonym. The corresponding results are all to be found in the appendix to chapter 2.

2.2 Conclusion

If we suspect that an anonymous work could have been written by a certain author, then the JGAAP program is suitable for detecting the possible author if we include his suspected name in the study. Normally a test of 500 words, as described in this study, is sufficient to obtain an approximate access to the author.

As seen in this study, if we know the name of the author, then he must appear in the first five places of the ranking of the JGAAP analysis. If the author does not appear in a test of 500 words, then it is doubtful that the work was published by him.

In this study we observe that a text of 3,470 words (21kb) can disclose the author of the text who then comes in the first place, as well as the names of the other possible pseudonyms or candidates that will come in the 2nd to 5th place in the ranking.

3 Diego de San Pedro, a pseudonym for Francesch Vicent

3.1 Authors in JGAAP

As we already stated, JGAAP is quite an interesting program, but not perfect. We used the following possible authors in this program for detecting authorship:

Alonso de Cardona (*Question de amor*)

Alonso de Proaza (*some of his texts*)

Diego de San Pedro (*Arnalte y Lucenda; Cárcel de amor*)

Fernando de Rojas (*some texts from his testament in 1541*)

Francisco López de Villalobos (*Costumbres humanas*)

Hernando del Castillo (*Cancionero*)

Juan Ramirez de Lucena (*Vita Beata and other works*)

Juan de Flores (*Grimalte and Grisel*)

Juan del Encina (*complete works*)

Lucena (chess book *Arte de Ajedrez*, 1497; different parts of *Repeticion de amores* and letter to king Ferdinand in 1503)

Luis de Lucena (*some texts from his testament in 1552*)

3.2 Calisto is Lucena

The work of *La Celestina* has an interesting monologue of Calisto in which he is complaining about the death of his two employees and a judge. Many years ago Ricardo Calvo suspected that Calisto was Lucena and here is the confirmation thanks to the JGAAP program. However, we also see Juan de Fores as the author of *Lozana Andaluza*, a work printed in 1530 in Venice by Francisco Delicado. However, there is no reference to Juan de Flores being in Italy. It is now time to doubt the real existence of Juan de Flores as a novelist and JGAAP can hopefully confirm that Juan de Flores is none other than Lucena or Juan del Encina. On the other hand we see that the foreword of *Carcel*

de amor could have been written by Lucena. This work already had the attention of Prof. Francisco Marqués Villanueva who saw a connection between this work and the ambassador Juan Ramírez de Lucena.

We mostly observe the linguistic style of Diego de San Pedro and Juan del Encina in the book of *Lozana Andaluza* and little about Lucena. Although we are sure that Lucena wrote this book, the way to prove it is not so easy with JGAAP.

At first we have to clarify whether Diego de San Pedro is a pseudonym for Lucena. JGAAP showed that the foreword of *Cárcel de amor* was written by Lucena:

Foreword Carcel de amor (357 words, 2 kb)

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |

Lucena does not come out well, his pseudonym Juan de Flores does it much better. We see the best results in the test of 3,470 words. Here we find Lucena near his pseudonym Juan de Flores:

Apparently the work *Pasión trovada* had been printed in 1496. We did a JGAAP test with a list of different authors from that period, including Diego de San Pedro to find out whether Diego de San Pedro was indeed the author.

Pasión trovada (3470 words, 21 kb)

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |

| Alonso de Proaza | 4 | 1 | | 1 | 2 | 6 |
| Lucena | 2 | | | | | 2 |
| Lucas Fernandez | | | 1 | | | 1 |

However, the work has the linguistic characteristics of Juan de Flores. Furthermore it is rather strange to observe that the word *justedad* in Lucena's *Repetición de amores* does not figure in the other books we have in our database, with the exception of *Pasión trovada*.

Nothing more is known about Diego de San Pedro. There are no precise dates of birth and death. He probably died in the early years of the 16th century, but there is no proof of that. We do not even know the number of his literary works. Researchers state that he was the author of the following titles: *Arnalte y Lucenda* (1491), *Cárcel de amor* (1492), *Pasión trovada*, and *Desprecio de la Fortuna*.

The situation with Juan de Flores is not much better and researchers think that he died around 1525. We could not find the reason why they state this date, because I am not aware of his books between 1500 and 1525.

We hope to have made clear that the work *Lozana Andaluza* had to do with Lucena.

Having clarified the issue of Diego de San Pedro which is a pseudonym for Lucena, it is necessary to understand that we have the dialogue style of Juan de Encina in his *Églogas*, but not that of Lucena. From Lucena we only have the prosaic style of *Repetición de amores*. The fact that there is a difference in the dialogue and prosaic style is something that we can detect immediately by JGAAP. For that we take a text of the work *El modo de adoperare el legno de India occidentale* written by Francisco de Delicado and ask the database of authors to indicate who is the author . Theoretically JGAAP should give us Francisco Delicado based on *Lozana Andaluza*.

**Who is the author of *El modo de adoperare el legno de India occidentale*?

Here we see 12 authors and Lucena occupies the 2nd place of the 13 authors. Francisco Delicado (based on *Lozana Andaluza*) comes in the the 13th place with 0 points. We do not see traces of Francisco Delicado with JGAAP in the book of *El modo de adoperare el legno de India occidentale*?. This is due to the fact that this book is in the style of a story, while *Lozana Andaluza* by Francisco Delicado is in the style of a dialogue. The reason that Francisco López de Villalobos

figures in the 1st place can be due to the fact that Francisco Delicado copied certain texts of Francisco de Villalobos. This test is proof that Francisco Delicado is a pseudonym of Lucena.

Now the question is: do we have any text of Lucena in the dialogue style? The answer is yes. We have to take the second Celestina of Feliciano de Silva, which is another pseudonym of Lucena. (I will prove this in another forthcoming book). When we add this author to the previous list of authors shown in the beginning of this chapter, the JGAAP analysis is much better:

3.4 Analysis by words (Rolf Eberenz)

The language of Lucena's *Repetición de amores* (1497) is somewhat archaic, thus one automatically speculates on the father's authorship. By somewhat studying the language Rolf Eberenz showed us that the examples of *tendr...* and *vendr...* in the literary texts are few³³, but Lucena, son of the protonotary Juan Ramírez de Lucena, is one of the few authors who uses them in *Repetición de amores*.

We have not observed these examples in the literature of Juan del Encina. Instead we find this form in the first act of Calisto and Melibea's Comedy of Burgos³⁴, whose author is anonymous:

Calla, que para la mi santiguada, do vino el asno vendra el albarda
Calla, que para la mi santiguada, do vino el asno verná el albarda

3.4.1 The first example of words ending

Now we see that this way of expressing *vendr...* is also found 32 times in *Lozana Andaluza*. Here are 17 examples:

Mamotreto III

TÍA.- No, hija, que yo quiero ir abajo, y él me **vendrá** a hablar, y cuando él estará abajo, vos vendréis.

Mamotreto XII

LOZANA.- ¡Por mi vida, que es cosa de saber y ver, que dicen que en aquel tiempo no había dos españoles en Roma, y ahora hay tantos! **Vendrá** tiempo que no habrá ninguno, y dirán «Roma mísera», como dicen «España mísera».

Sólo con agua fría sanará, y si él viera que se le amansaba, cualquier cosa os diera. Y mirá que yo conozco al canónigo, que él **vendrá** a vaciar los barriles, y ya pasó solía que, por mi vida, si no viene cayendo, que ya no hago credencia, y por eso me entraré aquí y no iré allá, que si es mal de cordón o cosón, con las habas cochas en vino, puestas encima bien deshechas, se le quitará luego.

Mamotreto XXIX

LOZANA.- Callá, callá, que ya os entiendo. ¿Vacía **vendrá**, según Dios la hizo?

Mamotreto XXXV

Aquí **vendrá** mi mozo; dale tú aquello que sabes que escondimos.

Mamotreto XXXVII

PATRÓN.- «Bien venga el mal si viene solo», que ella siempre **vendrá** con cualquier demanda.

Mamotreto XXXIX

Así mismo vaya vuestro criado con nosotras, y **vendrá** cargado de todo cuanto en el banquete se diere, y avisadlo que se sepa ayudar porque cuando venga traiga qué rozar.

Mamotreto XLI

Y si nuestro favor a villanos, **vendrán** sus mujeres y, porque las enseñe cómo se han de hacer bellas, me traerán pajitas de higos y otras mil cosas, como la Tibulesa por el cuatrín del sublimato que le vendí, y como le prometí que otra vez le daría otra cosa mejor, porque secretamente se afeitase, pensó que hurtaba bogas y enviome olivas y muchas manzanas y granadas que de Baena no podían ser mejores.

Mamotreto XLII

Que no **vendrá** hombre aquí que no saque de él cuándo de la leña, otro el carbón, y otro el vino, y otro el pan, y otro la carne, y así, de mano en mano, sacaré la expesa, que no se sentirá, y esto, riendo y burlando, que cada uno será contento de dar para estas cosas, porque no parece que sean nada cuando el hombre demanda un bayoque para peras, y como le sea poquedad sacar un bayoque, sacarán un julio y un carlín, y por ruin se tiene quien saca un groso.

Mamotreto XLIII

JACOMINA.- Bastimento para la cena, que viene aquí mi señora y un su amigo notario, y ahora **vendrá** su mozo, que trae dos cargas de leña. Señor,

¿es vuestra merced de casa? Ayúdeme a descargar, que se me cae el bote de la mostaza.

Mamotreto XLV

Que como se hacen francesas o grimanas, es necesario que, en muerte o en vida, vayan a Santiago de las Carretas, y allí el carro y la corona de flores y las heridas serán su mérito y renombre a las que **vendrán**, las cuales tomarán audibilia pro visibilia.

Mamotreto LIII

LOZANA.- Siéntate, puta hechicera, que más **vendrá** por comer que por todos tus encantos.

Mamotreto LIV

LOZANA.- Y tú eres la priosta; va, que te llama, y deja subir aquella otra puta vieja rufiana sarracina con su batirrabo, que por apretaduras **vendrá**.

Mamotreto LIV

LOZANA.- Y vos beso y abracijo. ¿Qué cosa es ésta? ¿Quién os dijo que yo habría de ir a casa de la señora Jerezana? Ya sé que le diste anoche música de falutas de aciprés, porque huelan, y no sea menester que intervenga yo a poner bemol. Hací cuanto quisierais, que a las manos me **vendrás**.

Mamotreto LVIII

MONTESINA.- Capa no hay en casa que se le pueda dar, mas mirá si le **vendrá** bueno este sayo, que fue del protonotario.

Mamotreto LXII

MÉDICO.- Señora, entre ella y mí el acuerdo será que partiésemos lo ganado y participásemos de lo por venir, mas Rampín despriva a muchos buenos que querían ser en su lugar. Mas si la señora Lozana quiere, ya me puede dar una expectativa en forma común para cuando Rampín se parta que entre yo en su lugar, porque, como ella dice, no esté lugar vacío, la cual razón conviene con todos los filósofos que quieren que no haya lugar vacío; y, después de esto, **vendrá** bien su conjunción con la mía que, como dicen: «según que es la materia que el hombre maneja, así es más excelente el maestro que la opera».

Mamotreto LXII

Señora, vaya Jusquina delante y lleve los aderezos. Vamos por aquí, que no hay gente. Señora, ya comienzan las máscaras. ¡Mire vuestra merced cuál va el bellaco de Hércules enmascarado! ¡Y oliva, oliva de España, aquí vienen y hacen quistión, y van cantando! ¡Ahora me vezo sonar de recio! Entre vuestra merced y salgamos presto, que me **vendrán** a buscar más de cuatro ahora que andan máscaras, que aquí ganaré yo cualquier ducado para dar la parte a

maestro Arresto: él debe trala, que medicó el asno y meritó la albarda. ¡Pues vaya a la horca, que no me ha de faltar hombre, aunque lo sepa hurtar!

3.4.2 The second example of words ending

This way of expressing tendr... is also found 13 times in *Lozana Andaluza*. Here are 5 examples:

Mamotreto XIII

VIEJO.- Dejame hacer, y **tendré** mejor aliento para beber.

Mamotreto XV

LOZANA.- Pues vení acá, que eso mismo quiero yo, que vos estéis conmigo. Mirá que yo no tengo marido ni péname el amor, y de aquí os digo que os **tendré** vestido y harto como barba de rey.

Mamotreto XXIII

LOZANA.- Señor, hacé que lo tengáis limpio, y untadlo con populeón, que de aquí a cinco días no tendréis nada.

Mamotreto XXIX

GRANADINA.- Un señor no me deja a sol ni a sombra, y me lo paga bien, y me da otro que mi hija no me dará, y no sé cuándo tendré necesidad. Mirá, ¿qué me aconsejáis?

Mamotreto XL

LOZANA.- ¡Ay, pecadora de mí! ¿Quién son estos? Aquí me tendrán dos horas, ya los conozco.

3.5 The Inquisition and Juan Ramírez de Lucena

The exact text of the letter that Juan Ramírez de Lucena wrote to the king around 1485 is not known today, but fragments very representative of his orientation and arguments have been preserved: those are the passages cited by the egregious and famous doctor Alfonso Ortiz, canon of the holy church of Toledo³⁵, who hastened to reply through a treaty to refute the nineteen errors that he thought to have found in him, dangerous against the faith. Before, he says, he had warned Lucena about some without managing to make Lucena rectify them³⁶. The prologue by Ortiz has a sour tone, defending the dogmas of the church without taking into account the opinion of Lucena, who felt the Gospel as a love doctrine.

It is quite possible that the work of *Arnalte and Lucenda* (Lucenda without a 'd' Lucena) was devised by Juan Ramírez de Lucena, actively participating in a part of the texts, while his son Lucena (Diego de San Pedro) agreed to put his name down as the author and write, rectify, or add texts.

Although the prestige of Juan Ramírez de Lucena in the court and the Roman court – as a former family member of Pope Pío II – would save him from inquisitorial processes, the protonotary finally had to retract in a public act celebrated in Córdoba³⁷. The treatise against the

letter of the protonotary Lucena written by the canon of Toledo, doctor Alfonso Ortiz, appeared in 1493 numerating the suspected theological errors contained in the works of the protonotary Juan de Lucena³⁸.

3.6 Lucena defended his father

Keith Whinnom believes that Diego de San Pedro was aware of *Historia de duobus amantibus*³⁹:

San Pedro al comenzar su prólogo en el Cárcel de amor escribe: ‘puesto que así lo conozca, aunque veo la verdad, sigo la opinión’; Lucretia en la historia de Piccolomini se queja: ‘conozco lo mejor, y apremiada sigo lo peor’.

Loose translation:

At the beginning of his prologue to *Cárcel de amor* San Pedro writes: 'since I know it, although I see the truth, I follow the opinion'; Lucretia in the history of Piccolomini complains: 'I know the best, and prized I follow the worst'.

These two works serve to say something indirectly to the Catholic kings. The unknown Diego de San Pedro covertly complains about the continuous persecution against the Jews: the inquisition and the future expulsion of the Hebrews. In this sense *Cárcel de amor*, as a clear example of protest literature, is the most thrilling, and perhaps that is

why the author does not refer directly to the Catholic kings in this work, as was the case before in *Arnalte y Lucenda*.

3.6.1 The ideas of Francisco Márquez Villanueva

Márquez Villanueva very well describes the way of thinking of this unknown Diego de San Pedro, in agreement with the dialectical filigree of protonotary Juan de Lucena⁴⁰:

San Pedro ha debido ver imponerse a su alrededor, día a día, medidas políticas que considera injustas y que le lanzan a una meditación atormentada sobre los límites del poder y el derecho a la rebelión de los mortalmente oprimidos. Por eso, no deja de deslizar una serie de indicios significativos que nos permiten justificar muy bien ese fondo de rebeldía desesperada que hay en la lucha de Leriano con el monarca y, por extensión, la amargura de todo el libro....

No menos intrigante es la calificación que el rey hace de la culpa de Laureola y que lo mismo podría usarse para definir la limpieza de sangre, pues «si castigada no fuese.... Podría amanzillar la fama de los pasados y la onrra de los presentes y la sangre de los por venir; que sola una mácula⁴¹ en le linage cunde toda la generación». Laureola, a su vez, da un giro extraño a su protesta contra el rey, a quien reprocha haber dado crédito a un falso testimonio sin tener en cuenta precisamente ese determinismo de la sangre, pues «bien sabes la virtud que las corónicas pasadas publican de los reyes y reynas donde yo procedo; pues ¿por qué nacida yo de tal sangre creyste más la información falsa que la bondad natural?⁴²».

El verdadero sentido de tal argumento estaría entonces muy de acuerdo con aquella filigrana dialéctica de Juan de Lucena, cuando recordaba los esplendores bíblicos del pueblo judío para poner a los conversos en un pináculo de nobleza inaccesible para los cristianos viejos⁴³.

Loose translation:

San Pedro has had to see around him, day by day, political measures that he considers unjust and that throw him to a tormented meditation on the limits of the power and the right to the rebellion of the mortally oppressed. For that reason a series of significant signs allows excellently justifying this fund of desperate rebellion that there is in the struggle of Leriano with the monarch and, by extension, the bitterness of the whole book

No less intriguing is the king's qualification of Laureola's guilt and the same could be used to define the cleansing of blood, for "if it were not punished It may tarnish the fame of the past and the honour of those present and the blood of those to come; That a single macula in the lineage spreads throughout the generation. Laureola, in turn, gives a strange turn to her protest against the king, whom she reproaches to have believed a false testimony without taking into account precisely that determinism of the blood, because "you well know the virtue that the last chronicles publish of the kings and queens where I proceed; For ... why, being born of such blood, you believed more the false information than natural goodness?"

The true meaning of such an argument would then be very much in agreement with the dialectical filigree of Juan de Lucena when he recalled the biblical splendours of the Jewish people to put the converts at a pinnacle of nobility, inaccessible to the old Christians.

Before seeing this study of Francisco Marquez Villanueva, we had seen the hand of Juan Ramirez de Lucena in *Cárcel de amor*, since the things that this book describes seemed to be in accordance with the life of the prothonotary. The prothonotary had a big problem with the Inquisition and the queen saved him in time. But the study of Márquez Villanueva is great and shows some diplomatic steps⁴⁴ by the author:

1. To reach an agreement with Gallio, brother of the queen and favorable to Laureola, whose collaboration is indispensable in the event that, all other means exhausted, it would be necessary to resort to arms.
2. To achieve that Cardinal Gausa, with all the prelates and knights of the court, intercede for Laureola and illuminate the blindness of the king.
3. If the management of the cardinal fails, resort to that of the queen.
4. If the queen does not obtain pardon, to arrange that Laureola herself begs the king for her life.
5. As a last resort, the author will propose to the king a new judgment of God against false witnesses.

Referring Márquez Villanueva to the Inquisition, he indicates that the Inquisition was not implanted in a climate of political unanimity. The opposition came from Cardinal Mendoza and the confessor of the Queen, Brother Hernando de Talavera (without mentioning Juan Ramirez de Lucena and others). So here the protest of those people against the Inquisition is reflected in Cardinal Gausa, who is none other than the great Cardinal Mendoza. The Harvard professor continues⁴⁵:

A través de todas estas alusiones comprendemos mejor que nunca el sentido de la marga queja contra el rey que no mira por la honra de sus súbditos y los aflige con una interpretación rigorista y material de la ley, tras la que se esconden puras arbitrariedades y los odios más inconfesables Diego de San pedro no hace sino documentar con ello la existencia de un estado de ánimo muy lógico entre los conversos que acaban de presenciar y de sufrir las primeras actuaciones del Santo Oficio.

are hidden pure arbitrariness and the most unfaithful hatred. Diego de San Pedro does nothing but documents the existence of a very logical mood among the converts who have just witnessed and suffered the first actions of the Holy Office.

Diego de San Pedro was not a diplomat, but these diplomatic steps betray our ambassador of the Council of the King, Juan Ramírez de Lucena, who was accused by the great Inquisitor Tomás de Torquemada. Above we see the five steps present in *Cárcel de amor*. Step 2 corresponds to Cardinal Gausa (Cardinal Mendoza), then we have step 3 to resort to the management of the queen, which in the case of the protonotary was sufficient. But the protonotary's actions, writing things against the Holy Inquisition, forced him to be reconciled with the church, as it appears in the work of Alonso Ortiz⁴⁶: “*En Córdoba ante muchos prelados y maestros en theología se reconcilió a la iglesia: y fue condenada su carta y tratado públicamente*”.

We find the famous phrase of the prothonotary "I do not know to speak: I cannot be silent"⁴⁷ more broadly in *Cárcel de amor*, where

Diego de San Pedro says in his foreword to the "Alcaide" of the *Donceles*⁴⁸:

Aunque me falta sofrimiento para callar, no me fallestee conocimiento para ver cuánto me estaría mejor preciarme de lo que callase que arrepentirme de lo que dixiese, y puesto que assí lo conozca, aunque veo la verdad, sigo la opinión, porque si con dureza yerro con verguença pago.

His repentance was demonstrated by Diego de San Pedro in his work *Desprecio de la Fortuna*, where, according to Gil y Gaya, the author retracts his works *Arnalte y Lucenda* and *Cárcel de amor* through a few verses⁴⁹.

3.7 Conclusion

We hypothesise that the JGAAP program detected the linguistic style of Diego de San Pedro in the book *Lozana Andaluza* together with Lucena. However, around 1530 nobody was aware of Diego de San Pedro as he disappeared in 1500. Therefore somebody used this pseudonym in 1500 and JGAAP detected that the pseudonym Diego de San Pedro has the linguistic style of Lucena (Francesch Vicent).

On the other hand Francisco Márquez Villanueva also detected the hand of Juan de Lucena, the father of Lucena, in *Cárcel de amor*.

The language of Lucena's *Repetición de amores* (1497) showed us that the examples of tendr... and vendr... in the literary texts were used by Lucena. We observe the form of tendr. (7 times) in *Cárcel de amor*. We see the form tendr. (10 times) and vendr. (32 times) in the texts of *Lozana Andaluza*.

4 Juan de Flores, a pseudonym for Francesch Vicent

4.1 Biography of Juan de Flores

From the beginning we suspected that Juan de Flores could be a pseudonym for Lucena (Francesch Vicent). There are too many coincidences and we will do our best to clarify some of them in this chapter.

The first suspicion is that it is not easy to compile a biography of Juan de Flores who according to Gargano⁵⁰, taking Matulka⁵¹ into account, was a Sevillian nobleman and clergyman or rector of the University of Salamanca and chronicler of the Catholic monarchs.

On the other hand Beltrán de Heredia in the Bulario of the University of Salamanca has given us information in Latin about a man by the name of Juan de Flores, whose documents are reflected here with the abbreviated titles of the heading:

Documento número 1.021, págs. 503-504

Documento número 1.061, pág. 531

However, if we believe Gwara⁵², then we have to discard this Juan de Flores, Juan II's honorary chaplain, since this researcher says that Flores was probably born in 1440 and lived until at least 1503.

Therefore it seems more viable that Juan de Flores was named chronicler⁵³ of the Catholic monarchs on May 20, 1476 if we look at a note from Beltrán de Heredia⁵⁴:

Gwara establishes the date of the composition of *Triunfo de amor* between September 13, 1475 and May 21, 1476, because the battle of Toro gave a sudden change to the civil war in favour of the Castilians. Apparently the political conflicts of the early years of the Catholic monarchs gave the author inspiration for writing this work. The agreements between England, Burgundy, and France - agreements in which the ambassador Juan Ramírez de Lucena actively participated - are an example in this regard⁵⁵. At the end of the battle of Toro Juan de Flores was named chronicler. Lacarra observes that Flores did not pretend to identify himself with the "author" – storyteller and only Pedro Manuel Jiménez de Urrea (*Penitencia de amor*, 1902) and Juan de Segura (*Proceso de cartas de amores y quexa y aviso contra Amor*, 1956) coincide in this author/narrator remote. On the other hand Flores is a man of innovation, because he literary recreates the historical or literary characters and makes them indispensable figures in action⁵⁶.

This same innovation is observed in the works of Juan Ramírez de Lucena, where "cupido", the God of love, also figures. Another observation of Lacarra, discussing the edition of Gargano⁵⁷, in this

case the work of Triumph of Love of Flowers says the following:

Flores describe su obra como “paulina de amar” o “carta de apercevimiento” (176) y “breve suma” (175) de los acontecimientos que vivió. Su fin es avisar a las damas castellanas de la nueva ley de Amor por la que de ahora en adelante deben regirse, y por la cual serán ahora las mujrerres quienes inicien la conquista amorosa y no los hombres, como se acostumbraba en la antigua ley.

Was Lucena the incarnation of Grimalte? The Grimalte character in Grimalte y Gradisa states when he failed in his company: "I return to the kingdoms of Spain and the Castilian land to where I was native". (me buelvo a los reinos de España y castellana tierra donde yo natural era). We also see something similar in *Triunfo de amor*, where we observe his "Castilian and extreme condition"⁵⁸.

Juan Ramírez de Lucena was also a chronicler according to Francisco de Mosquera and Barnuevo. His work Numantina is still important, because it was published again in Soria in 2000, a work that we have consulted to see the words of Mosquera and Barnuevo that Paz and Meliá cites:

*También están incoporados en este linage los Ramírez y Lucenas, de los quales vuo en Soria personas principalísimas, y muy graves, como fue don Juan Ramírez de Lucena, hombre de muchas letras, docto en ambos Derechos, y Protonotario de la Santa Yglesia de Roma, Abad de Cobarrubias, y Chronista de los Reyes Católicos, el qual labró desde sus cimientos las famosas casas que llaman de los Leones en Soria, que por serlo tanto, y los sucessores en ellas de tan poca renta para sustentar tan gran labor en venido a menos de lo que fueron en sus principios*⁵⁹.

⁵⁹ **MOSQUERA DE BARNUEVO, Francisco** (1612). La Numantina / de el Licendo. Don Franco. Mosquera de Barnueuo... dirigida a la nobilissima ciudad de

It has never been possible to prove this statement by Mosquera and Barnuevo, but if we accept that Juan de Flores is connected to the Lucena clan, then the matter could be clarified. This idea may be fortified by Gwara⁶⁰ who observed that there was evidence of a protonotary named Flores who was active in late 1480 and early 1490, Gwara wondering if the writer shared a type of identity with the mysterious protonotary Lucena.

The issue is further complicated if we consider what Gwara says, pointing out that the work of Arnalte (Arnalte and Lucenda, by Diego de San Pedro, MS 22021, fols. 13r-63r, CNUM 2151) refers generically to the works of Flores due to a curious correction of the scribe:

Immediately above the introductory rubric, which reads “Sant Pedro a las damas de la rreyna nuestra señora” (fol. 13), the scribe of the codex has inserted “Johan de,” thereby modifying the reading to “Johan de San Pedro”⁶¹.

Joseph J. Gwara lets us know in his introduction of *Studies on the Spanish Sentimental Romance 1440-1450* that according to Langbehn's *Regula Rohland*, Juan de Flores is a sophisticated and innovative writer. Weisberger⁶² expresses this in similar terms. This agrees with our writer Lucena (Franchesch Vicent) who was also an innovative writer.

Among the funds that Don Luis de Salazar had in his possession was a manuscript that Julio Puyol published in 1934 under the title: *Crónica incompleta de los Reyes Católicos*. Today this manuscript is in the Library of the Real Academia de la Historia in Madrid, MS G-20. It describes the chronological order of anonymous events that took place between 1469 and 1476⁶³.

As we can observe from the JGAAP analysis, Juan de Flores, the author of *Grisel* and *Grimalte*, had nothing to do with this work. Consequently it must have been another author, maybe with the same name. However, the man who knew all the details in those years was Juan Ramírez de Lucena who could have been the source for his son Lucena.

Bárbara Matulka and most authors believe that Juan de Flores was in the household of the duke of Alba. Maybe this was the reason for him

to write this *Crónica*, in which we see the position of the Duke of Alba fortified. We think that Juan de Flores is another pseudonym of Lucena.

4.2 The research by Antonio Cortijo Ocaña

To understand the activities of Juan de Flores and his relationship to Lucena, son of the protonotary Juan [Ramirez] de Lucena well one must consult the studies of Antonio Cortijo Ocaña. Then we become aware of the fact that in the manuscript of Seville there is a relationship between Juan [Ramirez] de Lucena and Juan de Flores, although his son is not mentioned.

4.2.1 MS. 5-3-20 of Seville

There are different authors, among them an anonymous author, in a MS. 5-3-20 of the Library Colombina in Seville, containing the following works⁶⁴:

In the manuscript 5-3-20, compiled according to the epistolary criterion we also see that Juan [Ramírez] de Lucena and Juan de Flores are the authors of most of the works. According to Antonio Cortijo some anonymous works can therefore be attributed to Juan [Ramírez] de Lucena and Juan de Flores. Cortijo refers primarily to the work *Tratado de amores* incorporating an episode similar to *Celestina*, based on the *Historia de Duobus amantibus*⁶⁵ of Piccolomini (similar to *Repetición de amores*?). The history of *Duobus amantibus* could be inspired by *Amadis de Gaula*, as pointed by Amador Ríos⁶⁶.

JGAAP detected Juan de Flores as the anonymous writer of the *Tratado de amores*. On the other hand somebody with the linguistic style of Hernán Díaz, the author of *El Peregrino*, was the translator of the anonymous⁶⁷ *Cuatro oraciones a la República*. The manuscript 5-3-20 of the Library Colombina in Seville probably belonged to Lucena, son of Juan Ramírez de Lucena in the past.

In order to find out whether Lucena (Francesch Vicent) was involved in the work of *Cuatro oraciones a la República* we carried out a test with JGAAP.

In the last table we can see the names of Hernán Díaz and Cristobal de Villalón. We were sure that Hernán Díaz is a pseudonym of Lucena, but we were not sure about Cristobal de Villalón. So JGAAP could help us a little in clearing up this matter. Indeed we saw Hernán Díaz (Lucena) as an author, but we also see the pen of his father Juan Ramírez de Lucena.

Therefore we realized another test and this time without having the names of Hernán Díaz and Cristóbal de Villalón on the list of possible authors.

We again must take into account that this work could have been written by Lucena (Francesch Vicent).

As already observed, Lucena was heavily involved in translation and printing activities. He used the pseudonym Diego de San Pedro at the beginning of the nineties, changing his pseudonym to Juan de Flores when he worked in Salamanca. There is another manuscript that must have belonged to him:

4.2.2 MS II-1520

The work and influence in literature gets even clearer when we look at the famous manuscript of Palacio MS II-1520. This manuscript was already studied in 1972 by Professor Angel Alcalá⁶⁸ without paying

⁶⁸ From New York on April 21, 1972 Alcalá directed a letter with his questions about the codex II - 1520 that contains the beginning of *La Celestina* and of *Vita Beata* to the then director of the Palace Library, Consolación Morales, daughter of his old teacher Mr. Luis Morales Oliver. His letter was answered by her on June 28, 1972. Later the same year Alcalá visited the Palace Library to see the manuscript II-1520. He did not break the news to the world, since he was preparing a book about the

more attention to it. Faulhaber⁶⁹ rediscovered in 1989 the manuscript bearing the following text⁷⁰:

According to JGAAP it seems that the text of *Rey que no hace justicia* was written by Diego de San Pedro. However, the text is too short to obtain a reliable result.

The situation with the *Sermón en alabanza de los Reyes Católicos por la conquista de Granada* is completely different. Here there is no doubt that Juan Ramírez de Lucena was the author of this work.

Who is the author of the anonymous *auto I* of the *Comedia de Calisto y Melibea*? (4473 words, 26 kb)

We have given much attention to the texts of *Comedia de Calisto y Melibea*, auto I, (MS. 1520), because we thought years ago that Juan Ramirez de Lucena and Alonso de Cardona could have been two of the authors, but the new JGAAP test indicates to the contrary. We also showed that the main author of the whole text of *Comedia de Calisto y Melibea*, auto that was Juan del Encina and there were no traces at all of Juan Ramírez de Lucena in it.

4.2.3 Other Manuscripts in Madrid

In the National Library of Madrid there is a set of manuscripts that carry different numbers and of which the content is as follows⁷¹:

National Library of Madrid, MSS 22018-21

1) *Grimalte y Gradissa*, by Juan de Flores; MS 22018, CNUM 2144.

2) *Triunfo de Amor*, by Juan de Flores; MS 22019, CNUM 2145 (Fernández Jiménez 1986).

3) *La coronación de la señora Gracisla*, anonymous?; MS 22020, CNUM 2146.11

4) *Carta consolatoria que enbió el prothonotario de Lucena a Gómez Manrique quando murió su hija doña Kathalina, muger de Diego García de Toledo*; MS 22021, fols. 1r-2v, CNUM 2147.

5) *Respuesta de Gómez Manrique al prothonotario de Lucena*; MS 22021, fols. 3r-8r, CNUM 2148.12

6) *Carta enviada por Hiseo la Brunda a Tristán de Leonís quexándose del porqué la dexó presa a su causa y se casó con Hiseo de las Blancas Manos*, anonymous?; MS 22021, fols. 8v-10r, CNUM 2149.

7) *Respuesta de Tristán desculpándose de la inocente culpa que le encargan*, anonymous?; MS 22021, fols. 10v-12v, CNUM 2150.13

8) *Arnalte y Lucenda*, by Diego de San Pedro; MS 22021, fols. 13r-63r, CNUM 2151.

Some of these texts were studied by Fernando Gómez Redondo⁷² who informs that J. L. Gili said that the work originated around 1500. Not all texts were collected on continuing basis, as various kinds of paper were used (without watermark). Traces of the Aragonese language are being present throughout the codex not only in spelling and phonological and morphological features, but also in the interpretive senses derived from some of the works. Given these data K. Whinnom⁷³ concludes: "facts known lead us to imagine that a certain Aragonese, fond of letters in the early sixteenth century did transcribe various manuscripts that he possessed or borrowed from the owners".

The fact that there are traces of the Aragonese language in the manuscript is in accordance with our research, because it seems that Lucena's real name was Francesch Vicent, as we have explained in chapter 4.

JGAAP let us know that *La coronación de la señora Gracisla* probably with all types of securities was written by Juan de Flores (Lucena).

In other trials with JGAAP it was important to know who was the real author of the two works published in 1495, since we consider Juan de Flores as a pseudonym. For that reason we did not enter Juan de Flores into the database. It appears in its purest form that Diego de San Pedro was the author of *Historia de Grisel y Mirabella*.

Knowing that in its purest form Diego de San Pedro (a pseudonym for Lucena) was the real author of the *Historia de Grisel y Mirabella*, we expected the same results for the work *Breve tratado de Grimalte y Gradissa*. However, in this case the linguistic style was more in the direction of Francisco López de Villalobos, although Diego de San Pedro came in the second place. However, in the foreword we clearly see Lucena.

In the other tests analyzed by JGAAP we used Juan de Flores on the list of possible authors again and expected to see the marks of Juan de Flores in *Triunfo de amor*. Strangely enough, the linguistic style was again more in the direction of Francisco López de Villalobos.

Who was the real author of *Triunfo de amor* (819 words, 5 kb)?

Since we were convinced that Lucena was connected with this work, we performed another test, in this case of the foreword. As we expected, the foreword to *Triunfo de amor* had the linguistic style of Lucena, thus it became clear that Lucena (Francesch Vicent) worked as a publisher of his own texts and also used others' texts. We observed this in other books by him. Consequently it is necessary,

where possible, to obtain the JGAAP analysis of both the foreword and the texts to decipher Lucena's publishing activities.

4.3 Conclusion

As indicated by Antonio Cortijo, some anonymous works can be attributed to Juan [Ramirez] de Lucena. On the other hand his observations about the *Historia de Duobus amantibus* of Piccolomini with regards to *La Celestina* and *Repetició de amores* should be taken into account. His observation that the first act of *La Celestina* was connected with Lucena who wrote the *Repetición de amores* is sincerely brilliant.

JGAAP confirmed several of Cortijo's hypotheses and we observe that the analysis showed in certain cases that Juan de Flores is a continuation of Diego de San Pedro.

Several words that figure in *Repetición de amores* reoccur in Grisel, which is proof that Juan de Flores could have been a pseudonym o Lucena

The fact that there are traces of the Aragonese language in the manuscript is in accordance with our research, because it seems that Lucena's real name was Francesch Vicent, as we have explained in chapter 4.

5 *La Celestina* and Lucena

The study of the works of Diego de San Pedro and Juan de Flores is necessary to understand why these authors could appear as the authors of certain chapters of *La Celestina*. We now know that if these two writers occur in these chapters, in reality we're dealing with Lucena (Francesch Vicent).

5.1 Francesch Vicent (Lucena), the author of *La Celestina*

As we know, Lucena was the author of *Repetición de amores y arte de ajedrez, con CL juegos de partido*. Luis Rubio García of the University of Murcia was in his time a connoisseur of *Repetición de amores* and his comments clearly showed that Lucena could have been the author of the first six acts of *La Celestina*⁷⁴.

However, Rubio García was not the first with this idea. Antonio Carballo⁷⁵ also saw a similarity between *Repetición de amores* and *La Celestina*. Parilla⁷⁶ observed that the first act of *La Celestina* is similar to the *Historia de duobus amantibus* - a manuscript that the father of Lucena must have had in his large library, because he had worked as the scribe to Pope Pío II (Eneas Silvio Piccolomini) in Rome. Pedro Catédra⁷⁷ saw a similarity between the first act of *La Celestina*, Lucena's *Repetición de amores*, and the *Tratado de cómo al*

hombre es necesario amar. Jesús Gómez⁷⁸ and Fernando Gómez Redondo⁷⁹ also saw similarities between *La Celestina* and *Repetición de amores*. Antonio Cortijo⁸⁰ also thought that the first act of *La Celestina* had to do with Lucena who wrote *Repetición de amores*. Bienvenido Morros⁸¹ also saw a similarity between *Repetición de amores* and the first text of the ancient author of *La Celestina*.

5.1.1 The first proof

Analyzing *La Celestina* we found the word *alahé* 7 times⁸², viz: 4 times in act 1; once in act 3, once in act 7, and once in act 11. Thereafter we have tried to find this word in other books of the 15th and 16th century. Strangely enough, we only found it in Juan Ramírez de Lucena's *Vita Beata* and in the *Libro de Buen Amor*. Consequently it is clear that Lucena borrowed it from his father's book⁸³ and so he was one of the authors of *La Celestina* and probably the ancient author.

5.1.2 The second proof

Another proof that *La Celestina* was written by Lucena as continuation of *Repetición de amores* is the fact that we see similar texts in both works:

Repetición de amores:

Es otrosí la muger **principio de pecado, arma del diablo**⁸⁴, **expulsión del parayso**, vivera de delictos, transgressión de la ley, doctrina de perdición, dessuelo muy sabido, amiga de discordia, confusión del hombre, pena que desechar no se puede, notorio mal, continua tentación, mal de todos deseado, pelea que nunca cessa, daño continuo, casa de tempestad, impedimento solícito, desvío de castidad, puerta de la muerte, sendero herrado, llaga de

⁸⁴ El cardenal Albornoz fundó el colegio de San Clemente de los Españoles de Bolonia gracias a una bula del papa Urbano V del 25 de septiembre de 1369. La cláusula de los estatutos por la que el cardenal prohibía la entrada de mujeres en su colegio dice: "La mujer es cabeza del pecado, arma del diablo, expulsión del paraíso y corrupción de la ley antigua, por lo que toda conversación con ella ha de ser evitada: prohíbo que nadie se atreva a introducir en el colegio mujer alguna, aun cuando fuera honrada". Cfr. Los estatutos de "El Real Colegio San Clemente de los Españoles de Bolonia".

En la *Celestina* hallamos:

Por ellas es dicho: arma del diablo, cabeça de pecado, destruyción de parayso. ¿No has rezado en la festiuidad de Sant Juan, do dize: Las mugeres e el vino hazen los hombres renegar; do dize: "Esta es la muger, antigua malicia que a Adán echó de los deleytes de parayso; esta el linaje humano metió en el infierno; a esta menospreció Helías propheta &c.?"

scorpión, camino para el fuego, universal temptación, mal incomportable, compañía peligrosa, destrucción de la gracia, de salud enemiga, de méritos disminución, de virtud siniestro desagradescimiento de servicios, enfermedad incurable, de ánimas ratonera, de la vida ladrón, muerte suave, herida sin sentimiento, delicada destrucción, rosa que hiede, lisonja crecida, pestilencia que manzilla al ánima, disminución de las fuerzas y disformación, y destrucción con que Dios se dessirve y el ánima se pierde, y el próximo se offende, por quien cuerpo y ánima *reciben aposentamiento en el infierno; porque ella ciega el sentido y aparta el pensamiento de Dios y nos haze inconstante y caher de cabeza, y por quien somos de Dios aborrecidos y a este siglo aficionados y del cielo enagenados.

Primer acto de la Comedia Calisto y Melibea:

SEMPRONIO.- ¿Escociote? Lee los ystoriales, estudia los filósofos, mira los poetas. Llenos están los libros de sus viles e malos exemplos e de las caydas que leuaron los que en algo, como tú, las reputaron. Oye a Salomón do dize que las mugeres e el vino hazen a los hombres renegar. Conséjate con Séneca e verás en qué las tiene. Escucha al Aristóteles, mira a Bernardo. Gentiles, judíos, cristianos e moros, todos en esta concordia están. Pero lo dicho e lo que dellas dixere no te contezca error de tomarlo en común. Que muchas houo e ay sanctas e virtuosas e notables, cuya resplandesciente corona quita el general vituperio. Pero destas otras, ¿quién te contaría sus mentiras, sus tráfigos, sus cambios, su liuiandad, sus lagrimillas, sus alteraciones, sus osadías? Que todo lo que piensan, osan sin deliberar. ¿Sus disimulaciones, su lengua, su engaño, su oluido, su desamor, su ingratitud, su inconstancia, su testimoniar, su negar, su reboluer, su presunción, su vanagloria, su abatimiento, su locura, su desdén, su soberuía, su subjeción, su parlería, su golosina, su luxuria e suziedad, su miedo, su atreuemiento, sus hechizerías, sus embaymientos, sus escarnios, su deslenguamiento, su desvergüença, su alcahuetería? Considera, ¡qué sesito está debaxo de aquellas grandes e delgadas tocas! ¡Qué pensamientos so aquellas gorgueras, so aquel fausto, so aquellas largas e autorizantes ropas! ¡Qué imperfición, qué aluañares debaxo de templos pintados! Por ellas es dicho: **arma del diablo, cabeça de pecado, destruyción de parayso**. ¿No has rezado en la festiuidad de Sant Juan, do dize: Las mugeres e el vino hazen los hombres renegar; do dize: Esta es la muger, antigua malicia que a Adán echó de los deleytes de parayso; esta el linaje humano metió en el infierno; a esta menospreció Helías propheta &c.?

5.1.3 The third proof

Luis Rubio García held the opinion that the first six acts were from Lucena and the remaining acts from Fernando de Rojas:

...Dada la prioridad de Lucena, la cuestión a plantear sería ¿quién copió a quién? Se podría pensar si en sus encuentros o en las aulas discutieron sobre esta temática. O bien se encontraron ya escrito un modelo común, pero en tal caso no debía limitarse a un acto, sino a los seis primeros de *La Celestina*, que son en esquema los que recoge Lucena. Me inclino que el argumento sería conocido no sólo por la tradición clásica que imperaba en las aulas salmantinas, sino como ya hemos apuntado que se hagan eco de algún suceso notario o conocida tradición de Salamanca, aunque luego el tratamiento como hemos visto seguiría caminos distintos, y Lucena no se aproximaría a la genialidad de Rojas.

Translation:

Given the priority of Lucena, the question to ask would be who copied who. You could think that they discussed this topic in their meetings or in the classrooms. Or there was already written a common model, but in such case it should not be limited to one act, but the first six of *La Celestina*, which are in outline those collected by Lucena. I am inclined to believe that the argument would be known not only for the classical tradition that prevailed in the Salamanca classrooms, but as we have already pointed out, that they echo some notary event or well-known tradition of Salamanca, although the treatment (as we have seen) would later follow different paths, and Lucena would not approach the genial style of Rojas.

Act 1 of La Celestina

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |
|-------------------------|-----|-----|-----|-----|-----|-------|
| Juan del Encina | 5 | 5 | 4 | 5 | 4 | 23 |
| Lucena | 4 | 4 | 5 | 4 | 5 | 22 |
| Juan de Flores | 2 | 3 | 3 | 3 | | 11 |
| Diego de San Pedro | 1 | 2 | 2 | 2 | 3 | 9 |

| Lucas ernandez | 3 | | | | | 3 |
| Alonso de Proaza | | | | | | 1 |
| Gil Vicente | | 1 | 1 | | 1 | |

As we will observe in these tables of JGAAP, the total number of acts of the ancient author is six. Thereafter Lucena probably had the help of Juan del Encina not only in Spain, but also in Italy. Consequently we see again that Lucena was the ancient author of *La Celestina*. He could be so thanks to his voyages to Italy and France.

Act 2 of La Celestina

| Francisco de Villalobos | 1 | | | | 4 | 5 |
| Gil Vicente | | 1 | 1 | 2 | | 4 |

As we will observe in these three tables, their main author of these three acts is Lucena. Thereafter we see two acts of Diego de San Pedro and one act of Juan de Flores. Both names are pseudonyms of Lucena. Consequently Rubio García was right when he claimed that the first six acts were by Lucena. The case is completely different for the remaining acts, where we see the likely participation of other authors. The details of the corresponding results of each act are all to be found in the Appendix to chapter 5.

Apparently *La Celestina* had three authors: Lucena as the ancient author, Encina who helped him in Spain and Italy, and Fernando de Rojas who could have worked with some short additional work, but is not detected by the JGAAP analysis. The great organizer of this work is Lucena. Rolf Eberenz⁸⁵ noted that the editions of Burgos (1499-1502), Toledo (1500), Sevilla (1501), and Zaragoza (1507) showed the form „*leístas*”, while the other editions contain *lo*. This could be an indication that these first four editions were connected with Juan del Encina and Lucena. Lucena might have been in charge of the various editions, because he went to Ferrara in Italy only after the death of his father (1504?), the protonotary Juan Ramírez de Lucena.

5.1.4 The fourth proof

As already indicated, Parilla⁸⁶ observed that the first act of *La Celestina* is similar to the *Historia de duobus amantibus*. Juan Ramirez de Lucena, the father of Lucena, must have had a manuscript of this work in his large library, because he had worked as scribe for Pope Pio II (Eneas Silvio Piccolomini) in Rome between 1460 and 1464.

We see in the *Historia de duobus amantibus Eurialo et Lucretia*, written in 1444 by the humanist Aeneas Silvo Piccolomini, later known as Pope Pius II, the first use of the epistolary form in the novel. Juan Ramírez de Lucena knew this manuscript and that of *Remedium amoris* written in 1446. He had many books and his son Lucena must have been aware of this Latin manuscript.

Translator of the *Historia de duobus amantibus Eurialo et Lucretia*

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |
|-------------------------|------------|------------|------------|------------|------------|--------------|
| Lucena | 5 | 5 | 5 | 4 | 5 | 24 |
| Diego de San Pedro | 4 | 4 | 3 | 2 | 3 | 16 |
| Juan de Flores | 2 | 3 | 4 | 1 | 1 | 11 |

| Francisco de Villalobos | 3 | | | | 4 | 7 |
| Alonso de Proaza | 1 | 2 | 2 | | | 5 |
| Lucas Fernández | | | | 5 | | 5 |

The possible translator of this Latin work is Lucena. It is quite possible that he translated and printed this work and *Remedium amoris* in Salamanca around 1496. However, this matter needs further study, as scholars believe that the translator was Diego López de Cortegana⁸⁷.

Apart from the edition in Salamanca in 1496 other editions were printed by the Crombergers in Seville in 1512, 1524, and 1530. Apparently there was also an edition published in Toledo in 1538, but copies of this latest edition were not found⁸⁸. But we continue with Cortijo, because his research is truly brilliant and shed unexpected light on Lucena⁸⁹:

Moreover, the initial episode of the *Repetición* also includes an *ad pedem litterae* translation of the beginning of the *Historia de duobus amantibus* (1444). No one has suggested the possibility that Juan de Lucena—Juan II’s ambassador to Rome and to the family of Eneas Silvio Piccolomini—might very well have been responsible for introducing the *Historia* in the Iberian Peninsula since he is one of the most plausible candidates. It would not be surprising then that his successor, Luis de Lucena⁹⁰, given that he was acquainted with Piccolomini’s text, might have decided to incorporate a burlesque paraphrase of the *Historia* within his university parody, the *Repetición*.

5.1.5 The fifth proof

5.1.5.1 Manuscript of Palacio

The work and influence on literature get even clearer if we look at the famous manuscript of Palacio II-1520. This manuscript was already studied in 1972 by Professor Angel Alcalá⁹¹ without paying more attention to it. In 1989 Faulhaber⁹² rediscovered the manuscript bearing the following text⁹³:

⁹¹ On April 21, 1972 from New York Alcalá addressed a letter with his questions on the codex II - 1520 that contains the beginning of *La Celestina* and *Vita Beata* to the then director of the Biblioteca de Palacio, Consolación Morales, daughter of his old teacher Mr. Luis Morales Oliver. His letter was answered by her on June 28, 1972. Later in the year Alcalá visited the Biblioteca de Palacio to see the manuscript. He did not break the news to the world as he was preparing a book about the protonotary Juan Ramírez de Lucena. Unfortunately Professor Alcalá never finished this book. (Private communication, with thanks to Professor Alcalá).

The manuscript II-1520 again showed us the relationship with the Lucena clan and *La Celestina*.

Apparently in the nineties of the fifteenth century there was a development of the gender pre-Celestina. The issue now becomes very interesting when one considers what Cortijo says⁹⁴:

“Scholars have not questioned why Lucena’s work and the first act of the Celestina are copied together in the same manuscript. But according to facts previously explained, it is likely that their co-appearance in MS II-1520 is not coincidental. Otherwise, how could we explain the presence of this third manuscript (the first being MS 22018-21 at the Biblioteca Nacional, and the second being MS 5-3-20 at the Colombina) containing both sentimental works and Lucena’s compositions? At this point, it is helpful to recall a study by Serrano y Sanz which linked Fernando de Rojas to a “Juan de Lucena,” a printer in the Puebla de Montalbán. Although the article by Serrano y Sanz concluded that this Juan de Lucena, a printer, was not our Juan de Lucena, translator of Fazio’s dialogue, this scholar proved that both Lucenas were blood relatives. Now our suspicions (again, just suspicions) are even greater: **both Lucenas, Piccolomini, Puebla de Montalbán, Salamanca, students in Salamanca around 1490–95, the first act of the Celestina, and Fernando de Rojas?”

Lucena, heavily involved in translation and printing activities, used the pseudonym Diego de San Pedro in the beginning of the nineties, changing his name to another pseudonym Juan de Flores when he worked in Salamanca.

The text of the *Glosa al romance ‘Rey que no hace justicia’* is very short, thus we have to doubt whether Diego de Pedro was indeed the author of this poem.

The case of the *Sermón en alabanza de los Reyes Católicos por la conquista de Granada* is completely different. Here there is no doubt that Juan Ramírez de Lucena was the author of this work.

José Luís Pérez López studied the *Sermón en alabanza de los Reyes Católicos por la conquista de Granada* and already suspected that it was written by Juan Ramírez de Lucena⁹⁵. So here is the confirmation.

The manuscript II-1520 belonged to the convent of Santa Cruz de Segovia⁹⁶, headquarters of the General Inquisitor Tomás de Torquemada. Not only was there a controversy between Alfonso Ortiz and Lucena, but we know that at the beginning of the Inquisition there was a bitter dispute between Fray Tomás de Torquemada and Juan Ramírez de Lucena, and the latter had been saved from Torquemada's attacks by Queen Isabella's intervention⁹⁷.

5.1.5.2 The manuscript of Seville

The work *Grisel y Mirabella* appears in MS 5-3-20 of the Library Colombina in Seville, having the following works⁹⁸:

Biblioteca Colombina of Seville, MS 5-3-20

1) *Cuatro oraciones a la República*, by Stephano Porcari, anonymous translator?; fols. 1r-16r CNUM 2315, 7119, 7120, 7121 (Parrilla 1986).14

2) *Fragmento del Tratado de amores*, anonymous?; fols. 17r-22r, CNUM 2316 (Parrilla 1985).15

3) *Epístola exortatoria a las letras*, by Juan de Lucena to Fernando Alvarez Zapata; fols. 22v-26r, CNUM 2317.

4) *Triunfo de Amor*, by Juan de Flores; fols. 27r-68r, CNUM 2318 (Fernández Jiménez).

5) *Fragmento de la Historia de Torrellas y Brianda*, fragment of *Grisel y Mirabella*, by Juan de Flores; fols. 69r-86r, CNUM 2319.

6) *Carta de buena nota*, Gómez Manrique addressee, anonymous?; fols. 86v-87r, CNUM 2320.

7) *Respuesta de Gómez Manrique [a la Carta de buena nota]*; fols. 87r-89r, CNUM 2321.

8) *Cartas de Grimalte y Fiometa*, fragment of *Grimalte y Gradissa*, by Juan de Flores; fols. 90r-101v, 2322.

In manuscript 5-3-20, compiled according to the epistolary criterion, we also see that Juan Ramirez de Lucena and Juan de Flores are the authors of most of the works. According to Antonio Cortijo some anonymous works can therefore be attributed to Juan [Ramirez] de Lucena and Juan de Flores. Cortijo refers primarily to the *Tratado de*

amores incorporating an episode similar to Celestina, based on the *Historia de Duobus amantibus*⁹⁹ of Piccolomini (similar to *Repetición de amores?*). The history of *Duobus amantibus* could be inspired by *Amadis de Gaula*, as pointed out by Amador Rios¹⁰⁰.

JGAAP detected Juan de Flores as the anonymous writer of the *Tratado de amores*. On the other hand somebody with the linguistic style of Hernán Díaz, the author of *El Peregrino*, was the translator of the anonymous¹⁰¹ *Cuatro oraciones a la República*. The manuscript 5-3-20 at the Library Colombina in Seville probably had belonged to Lucena, the son of Juan Ramírez de Lucena.

As already observed, Lucena was heavily involved in translation and printing activities. He used the pseudonym Diego de San Pedro at the beginning of the nineties, and changed his name to Juan de Flores when he worked in Salamanca. There is another manuscript that must have belonged to him:

Some of these texts were studied by Fernando Gómez Redondo¹⁰³ who informs that J. L. Gili said that the work originated around 1500. Not all texts were collected on continuing basis, as various kinds of paper were used (without watermark). Traces of the Aragonese language are present throughout the codex not only in spelling and the phonological and morphological features, but also in the interpretive senses derived from some of the works. Given these data K. Whinnom¹⁰⁴ concludes: "facts known lead us to imagine that a certain Aragonese, fond of letters, in the early sixteenth century did transcribe various manuscripts that he possessed or that he borrowed from the owners".

The fact that the manuscript contains traces of the Aragonese language is reflected in our research, because it seems that Lucena’s real name was Francesch Vicent, as we have explained in chapter 4.

JGAAP let us know that *La coronación de la señora Gracisla* was probably written by Juan de Flores (Lucena). *Carta enviada por Hiseo la Brunda a Tristán de Leonís* seems to have been written by Diego de San Pedro, and the *Respuesta de Tristán* probably also by Diego de San Pedro (Lucena).

5.1.6 The sixth proof

Rolf Eberenz showed us that the examples of *tendr...* and *vendr...* in the literary texts are few¹⁰⁵, but Lucena, the son of the protonotary Juan Ramírez de Lucena, is one of the few authors who use them - in *Repetición de amores* *tendr..* occurs 3 times and *vendr..* 4 times. Consequently this way of writing will be an excellent additional tool to find possible works by Lucena. And applying this tool confirmed many of our hypotheses in previous years:

Occurrence of the words *tendr..* and *vendr..*

| Año | Author | Book | tendr.. | vendr.. | Rojas* |

This is another proof that apart from the fact having written *Repetición de amores* Lucena was also the author behind a pseudonym of *Cárcel de amor* and *Grisel*. On the other hand he was involved in the writing of *La Celestina* with the help of Juan del Encina. These characteristics of Lucena give us a further possibility to see in which acts of *La Celestina* he was active. We found:

5.1.7 The seventh proof

Francesch Vicent, the inventor of draughts¹⁰⁶, was the author of a chess book in Valencia in 1495. An author who did not like to give his name and used the pseudonym of Lucena was the author of a chess book printed in Salamanca in 1497. In Ferrara we observe that Francesch Vicent was the chess teacher of Lucrecia Borgia¹⁰⁷. There is all reason to believe that Francesch Vicent had solid friendship with Ludovico Ariosto in Ferrara and the latter had the idea to write about the courtiers. And so we saw appear *Il Cortegiano* by Baldassare Castiglione years later that was dedicated to Ludovico Ariosto.

It was, Mrs. Gentile Feltria de Campo Fregoso, the illegitimate sister of Guidobaldo de Montefeltro, who financed the work *Tragicomedia of Celestina y Melibea*, which was published in January 1506 by the printer Eucharius Silber in Rome. The work was translated into Italian¹⁰⁸ in 1505 by Alonso Ordóñez, a messmate of the Pope. Ordóñez came from the town of Segorbe as did Francesch Vicent. We see Ordóñez years later in 1517 displace Alonso de Proaza at the University of Valencia¹⁰⁹.

Marco Gerolamo Vida was a major Italian poet and scholar who allegedly began to write a Latin manuscript of *Scacchia Ludus* or *De ludo scaccorum* in 1507, which was finished in 1510. The poem was instructed by Federico Fregoso, the son of Gentile Feltria de Montefeltro. Murray¹¹⁰ tells us that in 1525 a work was published

with a poem of 742 lines under the title *Liber Scacchorum* without the permission of the author, who then made a publication in 1527 through Ludovico Vicentino. Murray also observed that the poem of *Scachs d'amor* has some striking resemblances to Vida's *Scaccha Ludus*¹¹¹.

This betrays the fact that Francesch Vicent was aware of this manuscript of *Scachs d'amor* and had informed Federico Fregoso about it.

Again we see the influence of Francesch Vicent (Lucena). Federico Fregoso was a friend of Castiglione and Bembo¹¹². Bembo¹¹³ was in the service of Lucrecia Borgia in 1502 and 1503 and between 1506 and 1512 he was at the Court of Urbino with Guidobaldo de Montefeltro and his wife Elisabetta Gonzaga. On the other hand Baldassarre Castiglione lived in the court of Urbino with Duke Guidobaldo di Montefeltro and his wife Elisabetta Gonzaga between 1504 and 1506¹¹⁴. In 1506 he traveled to England to receive the order of the Garter for Duke Guidobaldo from the hands of Henry VII and in 1507 became an Ambassador of Guidobaldo in Milan by the side of the French King Louis XII.

Studying Castiglione's book we have always had the impression that to write his book this author had noticed the authors of the Lucena clan - Francesch Vicent and Juan del Encina. It was said in the book of *Il Cortegiano* by Baldassare Castiglione: "Guardate i Spagnoli, i quali

par che siano maestri della Cortegiania?". Castiglione says the following about chess in his Italian book¹¹⁵:

"And what," replied my lord Gaspar, "do you say of the game of chess?" "It is certainly a pleasant and ingenious amusement" said messer Frederico. "But I think there is one defect in it. And that is, there is too much to know, so that whoever would excell in the game of chess must spend much time on it, methinks, and give it as much study as if he would learn some noble science or do anything else of importance you please; and yet in the end with all his pains he has learned nothing but a game. Therefore I think a ver unusual thing is true of it, namely that mediocrity is more praiseworthy than excellence."

My lord Gaspar replied:

" Many Spaniards excel in this and divers other games, yet without giving them much study or neglecting other things."

" Believe me," replied messer Frederico, " they do give much study thereto, although covertly. But those other games you speak of, besides chess, are perhaps like many I have seen played (although of little moment), which serve only to make the vulgar marvel; wherefore methinks they deserve no other praise or reward than that which Alexander the Great gave the fellow who at a good distance impaled chick-peas on the point of a needle."

Without members of the Lucena clan, in this case without Francesch Vicent (Lucena), Castiglione could never have written his book. The book *The Courtesan* was dedicated to Alfonso Ariosto (1475-1525) of Ferrara, a cousin of Ludovico Ariosto, since he had given the idea to Castiglione. Logically speaking, it was Alfonso Ariosto who was in contact with Lucena in Ferrara, because he served the Eastern family in Ferrara in the same place where Francesch Vicent had been around 1506.

Ludovico Ariosto (1474-1533) also learned from the courtier Lucena, since in 1508 he presented his first comedy the *Cassaria* in Ferrara,

¹¹⁵ Strangely enough the chess issue was not indicated in the book of Boscan.

BOSCÁN, Juan (1873) *Los cuatro libros del Cortesano*. Edición dirigida por D. Antonio María Fabié, Madrid

and today Ludovico Ariosto is considered one of the patriarchs of comedy¹¹⁶.

¹¹⁶ **VECCHIO, Laura M. del** (2002) *Archetypal Female Figures in the Works of Bartolomé de Torres Naharro and Other Renaissance Spanish and Italian Dramatists*. Tesis doctoral, State university of New York at Buffalo, p. 66

A proof in this sense is the influence of Amadís de Gaule on Ludovico Ariosto¹¹⁷. This Italian author, in his *Orlando furioso*, written in 1516, speaks of Reinaldo de Montalbán. The work was written in Ferrarese, the dialect used in Ferrara. It is possible that this Italian poet saw the work Reinaldos de Montalbán, by the efforts of Francesch Vicent (Lucena). Apart from the influence of Amadís de Gaula another work of Lucena¹¹⁸ also influenced the work of Ludovico Ariosto, in this case the book by *Grisel y Mirabella*¹¹⁹, and we see the pen of Lucena again.

Was there already a contact between Castiglione, Bembo, and Francesch Vicent (Lucena) in the duchy of Urbino? It is almost certain and Castiglione noticed Lucena as a good courtier and chess player. Castiglione was aware that *Cárcel de amor* had already been translated into Italian, which implied that Castiglione used this book in later years¹²⁰.

5.1.8 The eighth proof

Apparently *La Celestina* had three authors: Lucena as the ancient author, then Encina who helped him in Spain and Italy, and Fernando de Rojas who could have worked with some small additional work, but has not been detected in the JGAAP analysis. The great organizer of this work is Lucena. Rolf Eberenz¹²¹ noted that the editions of Burgos (1499-1502), Toledo (1500), Sevilla (1501), and Zaragoza (1507) showed the „*leistas*” form, while the other editions contain *lo*. This could be an indication that these first four editions had to do with Juan

del Encina and Lucena. Lucena and Fernando de Rojas were probably in charge of the various editions in 1499-1501, because Lucena went to Ferrara only after the death of his father (1504?) the protonotary Juan Ramírez de Lucena.

5.1.9 The ninth proof

It is curious to observe that the word *vos* is not used in *La Celestina*, *Siervo libre de amor*, and *Cárcel de amor*¹²². We encounter the use of the word *vosotros* in *Repetición de amores* as well as in *La Celestina*. Lucena liked to use this word more than other authors and this can give us an indication of the anonymous works that could have been written by him. In this sense we refer to the anonymous author of the manuscript *Diálogo de la lengua* of which experts think that it was written by Juan de Valdés.

In a very short text his father Juan Ramírez de Lucena used this word on 6 occasions. Consequently his son Lucena was used to this word.

5.1.10 The tenth proof

Since we suspected that some of the works of Cristóbal de Villalón had to do with Lucena because of so many coincidences with Italy, we carefully studied the comments of the various authors. One statement of Ana Vian got my attention, because she stated that¹²³:

El Diálogo de las Transformaciones employs, as does *El Crotalón* and all works of Villalón, the verbal form *fue* for the first person of the undefined verb *ser* (*fui*), a rare form already in the prose of the mid sixteenth century despite still existing in the work *Guzmán de Alfarache*.

According to Ana Vian this is a significant feature, even if it is not conclusive in itself, especially when in *El Diálogo de las Transformaciones* *fue* and *fui* are alternating. Consequently it could be another proof in the case of *El Peregrino* and therefore we decided to make a simple proof with the words “yo fue” or “fue yo”, hoping that *El Peregrino* would appear. This simple test proved that there was indeed a link between *La Celestina* and *El Peregrino* and the author Cristóbal de Villalón.

In line with the observation of Ana Vian we also made an analysis of the word *fueste* instead of *fuiste* and again saw quite interesting figures. Surprisingly enough we found only three works in our

5.1.11 The eleventh proof

Ricardo Calvo thought that Calisto was the literary reincarnation of Lucena¹²⁴ in *La Celestina*. That hypothesis could not get the approval of another Spanish chess historian Pérez de Arriaga¹²⁵, and María Luisa Gómez-Ivanov considers it a speculation of little reliability¹²⁶. Calvo was one of the first researchers¹²⁷ after Rubio¹²⁸ who detected that there was a relationship between *Repetición de amores* and *La Celestina*. Today we know that Calvo's idea was visionary.

In *Repetición de amores* we find a text in which the author says that the work was written by Lucena, son of the “very wise” doctor and reverend prothonotary Juan Ramírez de Lucena, ambassador and from the Council of the Monarchs. In *la Comedia de Calisto y Melibea* we also find two references to a father. Sempronio, now in the words of Juan del Encina, says in the second act directed to Calisto: “And, therefore, do not estimate yourself in the clarity of your father, who was so magnificent, but in yours”, and in the monologue of the 14th act Calisto refers to his father: “Oh, cruel judge!, What bad payment you have given me for the bread that from my father you ate!”. Calisto is Lucena, which implies that Lucena was involved as much in *Repetición de amores* as in the *Comedia de Calisto y Melibea*. Fernando de Rojas’ participation was probably minimal, seeing that he

The text of 500 words in relationship with this cruel judge is as follows:

¡Oh mezquino yo!, cuánto me es agradable de mi natural la solicitud y silencio y oscuridad. No sé si lo causa que me vino a la memoria la traición que hice en partir de aquella señora, que tanto amo, hasta que más fuera de día, o el dolor de mi deshonra. ¡Ay, ay!, que esto es. Esta herida es la que siento ahora, que se ha resfriado. Ahora que está helada la sangre, que ayer hervía; ahora que veo la mengua de mi casa, la falta de mi servicio, la perdición de mi patrimonio, la infamia que tiene mi persona de la muerte, que de mis criados se ha seguido. ¿Qué hice? ¿En qué me detuve? ¿Cómo me puedo sufrir, que no me mostré luego presente, como hombre injuriado, vengador, soberbio y acelerado de la manifiesta injusticia que me fue hecha?

¡Oh mísera suavidad de esta brevísima vida! ¿Quién es de ti tan codicioso que no quiera más morir luego que gozar un año de vida denostado y prorrogarle con deshonra, corrompiendo la buena fama de los pasados? Mayormente que no hay hora cierta ni limitada ni a un solo momento. Deudores somos sin tiempo, continuo estamos obligados a pagar luego. ¿Por qué no salí a inquirir siquiera la verdad de la secreta causa de mi manifiesta perdición? ¡Oh breve deleite mundano! ¡Cómo duran poco y cuestan mucho tus dulzores! No se compra tan caro el arrepentir.

¡Oh triste yo! ¿Cuándo se restaurará tan grande pérdida? ¿Qué haré? ¿Qué consejo tomaré? ¿A quién descubriré mi mengua? ¿Por qué lo celo a los otros mis servidores y parientes? Trasquilánme en concejo y no lo saben en mi casa. Salir quiero; pero, si salgo para decir que he estado presente, es tarde; si ausente, es temprano. Y para proveer amigos y criados antiguos, parientes y allegados, es menester tiempo, y para buscar armas y otros aparejos de venganza. ¡Oh cruel juez!, ¡y qué mal pago me has dado del pan que de mi padre comiste! Yo pensaba que pudiera con tu favor matar mil hombres sin temor de castigo, inicuo falsario, perseguidor de verdad, hombre de bajo suelo. Bien dirán de ti que te hizo alcalde mengua de hombres buenos.

Miraras que tú y los que mataste en servir a mis pasados y a mí érades compañeros; mas, cuando el vil está rico, no tiene pariente ni amigo. ¿Quién pensara que tú me habías de destruir? No hay, cierto, cosa más empecible

que el incogitado enemigo. ¿Por qué quisiste que dijese: del monte sale con que se arde y que crié cuervo que me sacase el ojo? Tú eres público delincuente y mataste a los que son privados. Y pues sabe que menor delito es el privado que el público, menor su utilidad, según las leyes de Atenas disponen. Las cuales no son escritas con sangre; antes muestran que es menor yerro no condenar los malhechores, que punir los inocentes. ¡Oh cuán peligroso es seguir justa causa delante de injusto juez!

Loose translation:

O wretch that I am, how suitable and natural unto me is solitariness, silence, and darkness. I know not whether the cause of it be, that there cometh now to mind the treason that I have committed in taking my leave of that lady, whom I so dearly love, before it was further day? Or whether it be the grief, which I conceive of my dishonour by the death of my servants? Ay, ay, this is it that grieves me, this is that wound whereof I bleed. Now that I am grown a little cooler; now that that blood waxeth cold, which yesterday did boil in me; now that I see the decaying of my house, my want of service, the wasting of my patrimony, and the infamy which lights upon me by the death of my servants——what have I done'. ¿How can I possibly contain myself? How can I forbear any longer, but that I should presently express myself as a man much wronged, and show myself a proud and speedy revenger of that open injury which hath been offered me? Oh! the miserable sweetness of this most short and transitory life! Who is he so covetous of thy countenance, who will not rather choose to die presently than to enjoy a whole year of a shameful life, and to prorogue it with dishonour, losing the good report and honourable memory of his noble ancestors? Especially, sithence that in this world we have not any certain or limited time, no, not so much as a moment or a minute. We are debtors without time: we stand continually bound to present payment. Why have I not gone abroad, and made all the inquiry I can after the secret cause of my open perdition? O thou short delight of the world, how little do thy pleasure[s] last! And how much do they cost! Repentance should not be bought so dear. O miserable that I am, when shall I recover so great a loss? What shall I do? What counsel shall I take? To whom shall I discover my disgrace? Why do I conceal it from the rest of my servants and kinsfolk? They clip and note my good name in their council-house and public assembly, and make me infamous throughout the whole kingdom: and they of mine own house and kindred must not know of it. I will out amongst them: but if I go out and tell them that I was present, it is too late; if absent, it is too soon. And to provide me of friends, ancient servants, and near allies, it will ask some time, as likewise that we be furnished with arms, and other preparations of vengeance. O thou cruel judge, what ill payment hast thou made me of that my father's bread, which so often thou hast eaten! I thought that by thy favour I might have killed a thousand men without controlment. O thou falsifier of

faith, thou persecutor of the truth, thou man moulded of the baser sort of earth! Truly is the proverb verified in thee, that for want of good men thou wast made a judge. Thou shouldst have considered, that thyself and those thou didst put to death were servants to my ancestors and me, and thy fellows and companions. But when the base to riches doth ascend, he regardeth neither kindred nor friend. Who Would have thought that thou wouldst have wrought my undoing? But there is nothing more hurt-ful than an unexpected enemy. Why wouldst thou that it should be verified of thee, that that which came out of Etna, should consume Etna, and that I hatched the crow, which picked out mine eyes? Thou thyself art a public delinquent, and yet punishest those that were private offenders. But I would have thee to know, that a private fault is less than a public, and less the inconvenience and danger; at least, according to the laws of Athens, which were not written in blood, but do show that it is a less error not to condemn a delinquent than to punish the innocent. O how hard a matter is it, to follow a just cause before an unjust judge!

After many studies on Feliciano de Silva we came to the conclusion that he must be Lucena and we hoped to see his influence on the monologue of Calisto who according to my research also should be Lucena. In this case we used a short text of the monologue of act 14.

Monologue of Calisto (Lucena) 500 words (3kb)

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |
|--------------------|------------|------------|------------|------------|------------|--------------|
| Felicano de Silva | | 5 | 5 | 5 | 5 | 20 |
| Alonso de Cardona | 5 | 2 | 4 | 3 | | 14 |
| Juan del Encina | | | 3 | 4 | 4 | 11 |
| Juan de Flores | 4 | 3 | | | 3 | 10 |
| Lucena | 3 | 1 | 2 | 2 | 1 | 9 |
| Diego de San Pedro | | 4 | 1 | 1 | 2 | 8 |
| Hernán Díaz | 2 | | | | | 2 |
| Luis de Lucena | 1 | | | | | 1 |

In this table the author of the monologue is indeed Felicano de Silva. In other words Feliciano is the same author as the author of the monologue of Calisto.

Monologue of Calisto (Lucena) 500 words (3kb)

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |
|-------------------------|-----|-----|-----|-----|-----|-------|
| Lucena | 4 | 3 | 3 | 4 | 3 | 17 |
| Juan del Encina | | 1 | 5 | 5 | 5 | 16 |
| Juan de Flores | 3 | 4 | 2 | 3 | 4 | 16 |
| Alonso de Cardona | 5 | 2 | 4 | 2 | | 13 |
| Diego de San Pedro | 2 | 5 | 1 | 1 | 2 | 8 |
| Alonso de Proaza | 1 | | | | | 1 |
| Fr. López de Villalobos | | | | | 1 | 1 |

However, a test of 500 words could give reasons for doubt, so we made a test of the whole monologue of act 14.

Monologue of Calisto (Lucena) 1388 words (8kb)

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |
|-------------------------|-----|-----|-----|-----|-----|-------|
| Juan del Encina | 1 | 4 | 5 | 4 | 5 | 19 |
| Juan de Flores | 5 | 5 | 4 | 3 | 2 | 19 |
| Lucena | 4 | 2 | 2 | 5 | 3 | 16 |
| Diego de San Pedro | 3 | 3 | 3 | 2 | 4 | 15 |
| Alonso de Cardona | 2 | | 1 | | | 3 |
| Fr. López de Villalobos | | 1 | | 1 | 1 | 3 |

The results are still very doubtful, because although it is true that we may consider Juan de Flores as a pseudonym of Lucena, the influence of Juan del Encina is very high in the monologue. Therefore we shared many short monologues of Calisto to obtain more words. In this case it was advisable not to use the monologue of acts 1-3, because these acts are by Lucena. We wanted to see the development of the authors of acts 5-14.

Monologue of Calisto, acts 5-14 (Lucena) 2,645 words (15kb)

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |
|-------------------------|-----|-----|-----|-----|-----|-------|
| Juan de Flores | 4 | 5 | 4 | 3 | 3 | 19 |
| Diego de San Pedro | 3 | 4 | 3 | 4 | 4 | 18 |
| Juan del Encina | | 2 | 5 | 5 | 5 | 17 |
| Lucena | 5 | 3 | 2 | 2 | 2 | 14 |
| Fr. López de Villalobos | 1 | | 1 | 1 | 1 | 4 |
| Alonso de Proaza | 2 | 1 | | | | 3 |

We observe that the influence of Lucena is greater in this table, because the authors Juan de Flores and Diego de San Pedro are pseudonyms of Lucena. However, the influence of Juan del Encina is very high and he might have participated in these acts. Consequently the final verdict still has not been pronounced on this issue.

5.1.12 The twelfth proof

We can observe in Rojas' testament that he had a book of chess. It must have been Lucena's *Arte de Ajedrez* from 1497. He also had *el libro de Calisto* which probably referred to the first book of 1499 (?) of Burgos, where we find the word Calisto in the "Argument of the first author of this comedy" because this book did not have a cover. This way he had *Margarita poética* written by Albert von Eyb, edited in Rome in 1480. This work includes fragments of Philodoxus, a comedy known by Lucena and his father the prothonotary Juan Ramírez de Lucena thanks to his stays in Italy. These three books are enough to indicate that Lucena was at the University of Salamanca and involved in *Repetición de amores* and *Arte de Ajedrez* (1497) as well as in *la Comedia de Calisto y Melibea*, edited in Burgos around 1500. *Vita Beata* was also edited in Burgos, a work by his father Juan Ramírez de Lucena, and we can assume that Lucena was in charge of these two editions, just like the editions of *La Celestina* in 1499, 1500, 1501, 1507.

5.1.13 The thirteenth proof

Another interesting word is *qualquiera* that according to Rolf Eberenz¹²⁹ figures in *Repetición de amores* 12 times.

The strange thing about this word is that it only occurs many times in *Repetición de amores* and *La Celestina*. Most other books published in those years have considerably lower occurrence. We only state some of them hereafter:

Occurence of the word *qualquiera*

5.1.15 The fifteenth Proof

Francisco Márquez Villanueva sees the author of *Repetición de amores*, Juan de Lucena, as a likely classmate of Fernando de Rojas¹³⁰. We see again that even the greatest are wrong about Juan de Lucena. Juan de Lucena did not write *Repetición de amores*, but Lucena, son of Juan Ramírez de Lucena, did. However, what is of great value here is Márquez Villanueva spotting the similarity of *Repetición de amores* to *La Celestina*:

¹³⁰ MÁRQUEZ VILLANUEVA, Francisco (1993) *Orígenes y sociología del tema celestinesco*. Anthropos Editorial, p. 138

Por más que hoy pueda repugnarnos, el recurso a intermediarios resultaba también imprescindible, ya que hasta el simple expediente de la correspondencia amorosa se hallaba restringida por el escaso número de mujeres en posesión de artes de leer y escribir. Es justamente lo expuesto por la *Repetición de amores* (hacia 1497) de Juan de Lucena, un probable condiscípulo de Fernando de Rojas. Inflamados sus sentidos a la vista de otra Melibea, doncella de buen linaje, «la boca muy conveniente y los labios de coral muy aptísimos para morder; los dientes chicos y en orden puestos, que parecían de cristal»

Loose translation:

As much as it disgusts us, the resource for intermediaries also resulted as essential, because even the simple file of the love correspondence was found restricted by the low number of women in possession of arts of writing and reading. It is justly exposed by *Repetición de amores* (around 1497) by Lucena, the probable classmate of Fernando de Rojas. His senses inflamed at the sight of another Melibea: damcell of good lineage, “the mouth very conveyable and the coral lips very apt to bite; the small teeth and placed in order, that looked like crystal”.

The fact that precisely in 1496 two works of Silvio Piccolomini that appear in Salamanca, viz. *Estoria muy verdadera de dos amantes* and *Tratado muy provechoso de remedios contra el amor*, had a connection to *Repetición de amores* and *La Celestina*. Lucena could have had Piccolomini's manuscripts at his disposal and translated this work, because his father was at the Papal court around 1460.

To prove this we have to revert to the Dissertation of (713) Blanca Garrido Martín who shows that the term *Lozano* is found in *Repetición de amores* and our analysis of other works showed that this is also very rarely the case in other works, among them the translation of *Duobus amantibus*¹³¹.

5.1.17 The seventeenth proof

As we know, Lucena wrote the book *Arte de Ajedrez, con CL juegos de partido*. In *La Celestina* we find the chess expression *arme mates* and this is a clear reference to Lucena, because it is very difficult to find a similar expression in other books.

Donde, si perseueras, o de muerto o loco no podrás escapar, si siempre no te acompaña quien te allegue plazer, diga donayres, tanga cançiones alegres, cante romances, cuente ystorias, pinte motes, finja cuentos, juegue a naypes,

arme mates, finalmente que sepa buscar todo género de dulce passatiempo para no dexar trasponer tu pensamiento en aquellos crueles desuños, que rescebiste de aquella señora en el primer trance de tus amores.

5.1.18 The eighteenth proof

La Celestina is a humanistic, and according to the experts also rather dramatic comedy that only a person with a lot of information could write. The word *çena* that appears in *La Celestina* was not very common in Spain at the end of the 15th century. García Valdecasas points out¹³²:

Porque “cena” significa obra representable. «Teatro es lugar do fascían las *çenas*», había dicho el cultísimo don Enrique de Villena o de Aragón. En ese sentido usan el término los italianos, restauradores de la dramaturgia. En 1487, cuando Nicolò da Correggio –autor de la perdida *Fabula de Calisto (sic)* – estrena en Ferrara la *Fabula de Cefalo*, el cronista da cuenta del público, los decorados y los intermedios musicales.

Loose translation:

Because *cena* means play that can be represented. "Theater is the place where they made the *çenas*, had said the very learned Don Enrique de Villena or Aragón. In this sense, the Italians, restorers of dramaturgy, use the term. In 1487, when Nicolò da Correggio -author of the lost *Fabula de Calisto (sic)* - premiered the *Fabula de Cefalo* in Ferrara, the chronicler gave an account of the audience, the sets and the musical intermediates.

Juan Ramírez de Lucena already had contacts in Ferrara and could have known the theater in the court of Este perfectly. With regard to the translator Enrique de Villena (1384-1434), it seems to me that our protonotary had a connection with him, since the work of *Los doce trabajos de Hércules* was published tied together with the work *De Vita Beata* by Juan Ramírez de Lucena in 1499 in Burgos.

It is like that because in the *proemia* and *foreword* JGAAP detected the characteristic writing style of Juan Ramírez de Lucena.

In *Repetición de amores* we find the superlative *ísimo* and this way of writing is rare at the end of the 15th century¹³³. Apparently Lucena continues using them in his other books, among them *La Celestina*.

5.1.20 The twentieth proof

The word *adeleyta*, *adeleytar* and *adeleyto* we only find in the work *Repetición de amores*. Rather strange is to see that we find the verb *deleytar* and the word *a deleyte* only in *La Celestina* and the words *a deleytes* and the verb *deleytar* in Enrique Villena's *Los doce trabajos de Hércules*. Completely different is the situation for the words *deleyte* and *deleite*. It is rather strange that we do not observe the words *deleyte* and *deleite* in the Felicano de Silva's *Segunda Celestina*.

5.1.21 The twentieth first proof

A word that Lucena very little used was *antenado* in the *Repetición de amores*. We do not see this word in the *La Celestina*, neither in the Felicano de Silva's *Segunda Celestina*. There is all reason to believe that the author of *Repetición de amores* was the same as he of the *Tragicomedia de Lisandro y Roselia*. Consequently, we see here the relationship between the *Repetición de amores* and *La Celestina*.

The word *albayalde* we do not see in many books. The first time we see it is in the book *Corbacho* and thereafter it appears in a work of Rodrigo de Reinosa. Then it appears in the work *Repetición de amores*. From there it went to the work *La Celestina*. Consequently, here again we see the pen of Lucena.

We observe a valencianism in the 12th act of *La Celestina*:

A medio lado, abiertas las piernas, el pie izquierdo adelante, puesto en huida, las faldas en la cinta, la adarga arrollada, y so el sobaco, por que no me empache. ¡Que, por Dios, que creo huyese como un gamo, según el temor que tengo de estar aquí!

The right way in Spanish is to use the verb *envolver* for *arrollar*

5.2 1503 Juan de Lucena's letter to king Ferdinand V

Around the year 1503 the chief inquisitor of Zaragoza Hernando de Montemayor prosecuted Juan Ramirez de Lucena, his brother Carlos, and his other relatives on suspicion of Judaism. Lucena wrote to the king complaining that the judge did not consider the exemption, and requested letters to the royal ambassador in Rome and the pope to "whatever be just, provide me and my brother with." He had reasons to feel uneasy about him and his brother Fernando de Lucena who was also a protonotary as we have seen in other documents, because another protonotary, Felipe Clemente¹³⁴, was also arrested by the Inquisition and sentenced in Seo of Zaragoza on July 30 1503.

¹³⁴ **COMBESURE THIRY, Monique** (2003). El libro verde de Aragón. Introducción y transcripción Monique Combescure Thiry Presentación y estudio preliminar Miguel Ángel Motis Dolader. Zaragoza, pp. 92-93

Royalty had always protected the protonotary, but apparently this was over for whatever reason and the exemptions that Juan de Lucena had were not taken into account. Something similar happened with the apostolic canon Francisco Ortiz who left us a little autobiography¹³⁵. This apostolic nuncio, Francisco Ortiz, very loyal to Pope Sixtus IV in 1479 wanted to establish a canonical act in Cuenca with the inauguration of a nephew of the pope who was a young man of 20 and had no ecclesiastical vocation.

Seeing that this act was against his religious policy reform of the episcopate the kings took prisoners to the dean and town hall of Cuenca, and later also Ortiz. Logically, Ortiz asserted the Pontifical pass that would protect him as apostolic nuncio, but neither the kings nor the royal official hesitated for a moment in chase of the office¹³⁶. With this simple fact we show that the kings on more than one occasion ignored the highest authority of the church when the person in question was in disgrace.

Watching the events of 1503 that continued to follow we also know the steps of King Ferdinand in the Courts of 1502 in Zaragoza, as Zurita does not speak of them. Don Fernando called together the Courts of Zaragoza for July 28 1502, and to June 28 from Toledo, with the main objective to swear in Doña Juana and her husband. The first letter of summons was for his son Don Alonso, perpetual administrator of the archdiocese of Zaragoza. Ricardo del Arco signals that from Seseña from July 19 the king extended the Courts until August 4, because he was unable to go to Zaragoza before then. Court was finally held on 16 and 24 August. The oath of the princes took place

on October 24 before the King and juries of the city, and then returned to the council. The following year on April 2 1503 we see King Fernando in the council again, trying to obtain men armed for war with France. On April 4 the King was in Bujaraloz and appointed captains of the troops including his son, the Archbishop of Zaragoza, Don Alonso. In late 1503 King Ferdinand does not forget his son, Don Alonso de Aragón is sworn in as viceroy of Aragon before the deputies of the kingdom on 21 December 1503. The data of the privilege of the general lieutenancy of the archbishop is Monteagudo on December 11 where the King appointed his son as perpetual administrator of the archdiocese of Zaragoza¹³⁷.

Returning to the letter¹³⁸ of the protonotary Juan de Lucena who wrote to the king, in this letter he requested preferential treatment for serving the king and defended the charges, claiming that they come from the Aragonese Jews, his enemies for having him participate in the expulsion of those who refused to convert. Lucena's letter follows¹³⁹:

Carta de Juan de Lucena, consejero del Consejo real de Aragón, al rey Fernando V, escrita el 26 de diciembre de 1503.

"Muy alto y poderoso príncipe, rey y señor. Este inquisidor, después que prendió a mi hermano fasta aquí lo ha tenido y tiene encarcelado de cárcel tan estrecha que más no puede ser. No permite que yo ni mis hijos, ni otro ninguno, pariente ni extraño, le fable aun en presencia suya: ni aun ha querido

dar lugar que personalmente viniese ante él a proceder en su causa. Este es un rigor tan apartado de todo derecho que más no puede ser. Yo, señor, viendo la pasión de este juez, y fallando que siempre me ha tenido mala voluntad sin causa alguna, sino porque me vio exento de su jurisdicción, deseando tener a mí ya los míos so la potestat suya, lo que ha fecho ante él es lo que se sigue: atendido que {como V.A. sabe} con su voluntad y decreto, yo y mis hermanos y hermanas somos exentos de su jurisdicción y de cualquiera otro inquisidor, y viendo que fasta aquí este inquisidor nunca me ha demostrado con qué autoritat procede contra el dicho mi hermano, y ha tomado a sus manos mi proceso, habiéndole presentado mis bulas de exención, y habiéndole requerido librase de la prisión al dicho mi hermano, y revocase la inventariación que de sus bienes había fecho {pues del no podía conocer} ha convenido al dicho mi hermano apellar del a nuestro muy santo padre. Pluguiérame apellar al obispo si no porque era contra la exención. Ha respondido a la apelación {lo que antes debía responder a los requerimientos que por mi hermano fueron fechos} que como comisario apostólico conocía y entendía de proceder mandando pasar adelante en su causa. En este esta estado está la causa del dicho mi hermano. Yo, señor, reputo que por ninguna comisión apostólica la dicha exención no es revocada; antes tengo por subrepticia su dicha comisión, atendidas las cláusulas de la dicha exención y la forma della; por lo cual me ha parecido que la debo defender y estar en ella en esta manera impetrando del papa comisión de la dicha apelación: por lo cual suplico a V.A. me faga mercet de otorgarme letra para su embajador, y para el papa, que en lo que fuere justo provea a mí y al dicho mi hermano: que de lo así facer el papa V.A. helo terná en mucha complacencia. Ca si el dicho inquisidor quisiera haberme comunicado su comisión y viera que por ella era revocada la exención, no era menester otra altercación, que luego en este punto mi hermano y yo con él dejáramos la exención, y no curáramos della.”

"Este hombre va tan cauto, que por demasiado cauto y secreto da causa que justicia no se faga como facerse debe; y demuestra tratarse conmigo y con los míos con typo y no con zelo. Va muy público que cerca y trabaja para transtornar todo lo hecho en la Inquisición, aunque fuese juzgado y sentenciado; de donde se sigue que es de pensar que no gelo face facer zelo si no alguna otra causa temporal más que espiritual; pero no me maravillo, visto el asesor que tiene, amigo de Quintanilla por las causas que V.A. no ignora, pues las ha oído muchas veces y de personas diversas, y así no se maraville V.A. si de ellos me defiende con la dicha exención; y donde aquélla no bastase, o si bastase, ya V.A. pluguiese que de ella no gozase, trabajaré de salir de su juzgado por otro remedio. Por ende suplico a V. A. no reciba enojo de otorgarme las dichas letras; o si esto no quisiere V.A., tenga forma como el dicho obispo revoque la comisión ya fecha al dicho inquisidor de las causas mía y de mi hermano, y las cometa al obispo o a su oficial micer *Tienda, o a*

otra persona de buena fama y sciencia, porque de esta manera la justicia será administrada con zelo y como se debe, y no con typo como sería si por los sobredichos fuese administrada.

"Nunca el notario de mi proceso ha podido cobrar del inquisidor mi proceso por copiar la sentencia para enviarla a V.A., sinu con las mañas que ha tenido la ha sacado, que envió a V.A: autenticada y firmada de todos los letrados que en ella cupieron, a fin que sepa como la sentencia es absolutoria no suspensa de apelación; y es pasada en autoridad de cosa juzgada. Suplico a V .A. en lo de mi hermano tenga forma que el obispo escriba al inquisidor lo de *Aplaceria* para de fuera de Aljafería o dentro por toda ella, y que la pueda hablar yo y mis hijos y hiernos, y que sea en presencia del Inquisidor, o de quien él quisiere. Yo creo que él habrá enviado el proceso a V.A. o al obispo.

"Certifico a V.A. que si de judíos no, no es posible que de otri sea testiguado: y de judíos no me maravillo porque como enemigos nuestros, lo han fecho a causa de la expulsión dellos, la cual toda atribuían *a mi*, ya causa que el dicho mi hermano fue uno de los comisarios deputados por V.A. para ocupar los bienes de ellos, por lo cual tuvieron conmigo y con él grande enemiga; y se conjuraron para facernos falso testimonio, lo que está muy probado, y es muy público en esta ciudad. Con esto digo y suplico a V.A. mande escribir a maestre Martín Garcías ya maestre Crespo, y maestre Ros le informen de lo sobredicho lo que saben.

En esta ciudat por algunos se ha fecho suplicación a diputados sobre la exención que se face de los bienes de los muertos acusados, no obstante el concierto que V.A. fizo con sus fijos. La murmuración dello ha sido muy grande en gran cargo de V.A. Fueron llamados para consejo letrados donde yo fui llamado; fallellos todos encarados reprendiendo la exención que se facía contra dicho concierto: rogáronme que dixese lo que me parecía; díxeles como V.A. por fuerza se movía lo que se facía, porque por derecho estaba muy claro que los bienes de los confiscados no debían tornar a ellos, ni a sus fijos, ni a otros que se presumiese havergelos de volver, y que antes de la condenación no se podía facer mercet dellos. Todos cayeron en mi parecer, más por la fuerza del derecho que por su grado. Mas no estuve en ello aunque me llamaron para otro día: que tanto me han dado que facer estos buenos negocios que tengo, que en otross no he podido entender. Verdat es que me enviaron a decir de cierta letra que sobre ello recibiese V.A., ya mí me pareció, salvo en una cosa, que si V.A. quería que pasase lo fecho, no se podía facer en otra manera sino que el papa en ello dispensase, dispensando en este caso contra el derecho. Esto digo a V.A. por aviso suyo, y porque certifico que de los que más la Inquisición han defendido, yo siempre he sido uno. Helo fecho por favor de la fe y por servicio de V.A. ¡Plega a nuestro Señor que dél haya el galardón! que V.A. {si no lo manda enmendar y reparar), diré lo que dicen en este reino: *a buen servicio mal galardón, segun fuero de Aragón*. Nuestro Señor guarde y acreciente la salut y real estado de V.A. luengamente a su servicio. De Zaragoza a XXVI de diciembre de DIII."

"P.D. No dejaré de decir a V.A. la admiración que en esta ciudad va haciendo lo que se hace a mí y al dicho mi hermano en parte donde todo está a lo que V.A. mandare; y viendo la cualidad y condición nuestra, la reputación que de catholicos y buenos cristianos tuvieron nuestros pasados y nosotros tenemos, y viendo cuan servidores lo habemos sido y somos. Por cierto, Señor, a cuantos dello me hablan y me importunan {porque veo que no lo hacen sino por decir mal de mí y de V.A.; de mí por batir mis servicios, de V.A. por no tener memoria dellos) les digo que V.A. con el zelo que tiene de la fe, no atregua a nadie. Con esta respuesta los envío y se van satisfechos. Pero V.A. con esta respuesta no cumpliría con su buen servidor, y así conmigo ciertamente no cumpliría. No digo que al hereje (cuanto quiera fuese su servidor) lo hubiese de tolerar en su herejía.

"Guárdeme Dios tal cosa; mas yo oso decir a V.A. que a los que tiene conocidos y están en su servicio (pues es cierto están en opinión de buenos cristianos) otra plática debe guardar que con los otros: conviene a saber de no permitir prisión de tales que V.A. primero no se haga venir el proceso y reconosca los testigos quiénes son y de qué fama y condición, y eso mismo del acusado. Ca V.A. tiene tanta noticia de las personas, que luego conocerá la falsedad o la verdad. y cuando por sí no bastase a conocerlo, era de enviar por el inquisidor, y sacar déllo que sabe y lo que siente: y si esto no bastase, mandarle que antes de proceder a capción de la persona tal se informase de la fama y condición del acusado cuanto a ser cristiano o no; y con lo que fallase que tornase a V.A. todo con él y con algún otro proveyese lo que se debiese proveer. Ca si V.A. viese los testigos de mala fama y el denunciado de buena, y viese otras circunstancias de inimizia o de odio o de otras causas que moviesen a los testigos más que por zelo, cierto es que no permitiría se procediese a capción de tal persona. Así lo dice una decretal que en esta materia es la mayor instrucción que el inquisidor tiene, y comienza: *In fidei faverem* en el título *de Haereticis* en el sexto. Pláceme de así acotarlo porque mejor se informe de lo que digo."

"Y porque no se maraville V.A. porque yo digo que con otro cuidado debe en el un caso V.A. hablar que en el otro, así lo enseña el derecho. Ca el papa en la decretal que empieza: *Nisi* en el título *de Oficio legati* no se empachó de decir sobre la pena. de uno que había cometido cierto crimen que por ser su amigo no le quería dar la pena que merecía. Así que, Señor, no es de tratar el servidor como el otro aun en la justicia; ca se puede proceder en el uno poniendo más diligencia que en otro para que su verdad no sea ocultada, y dándole los arbitrios que sin lesión de la justicia se pueden dar. Por eso aquel singular rey D. Enrique que sobró al rey D. Pedro mandó que de sus servidores otro no conociese sino él. Por ende con gran razón suplico a V.A. proveer en estos fechos míos, y de mi hermano como le suplico, pues procede todo de justicia; y sin pervertir aquella, V.A. lo puede mandar. Así mismo las

comisiones que pido todas son arbitrios y justicias. No sé cómo V.A. las pueda denegar a su servidor. De V.A. humilde siervo que sus reales manos besa,

JOANNES DE LUCENA

Loose translation:

Letter from Juan de Lucena, advisor to Aragón, to king Fernando V, written on 26 December 1503

"Very high and mighty Prince, King, and Lord, this inquisitor, after having caught my brother here, has been so closely imprisoned for such a long time that nothing else can be done."

"He does not allow me or my children, or anyone else relative or stranger to talk to him, not even in his presence: nor has he wanted to give place for me to personally come before him to proceed in his cause. This is a rigour so separated from all right that more cannot be the case. I, Sir, looking at the passion of this judge, and finding that he always has had a bad will for me without a cause, because he saw me exempt from his jurisdiction, he is wishing to have mine on his authority. What has been done before him is what follows: attended (as V.A. knows) with his will and decree, I and my brothers and sisters are exempt from his jurisdiction and that of any other inquisitor, and seeing that it is until here that this inquisitor has never shown me with what authority he proceeds against my said brother, and he has taken my process into his hands, although I presented before him my exemption bull, and having requested him to free from prison my said brother, and revoking the inventory that he had done from his goods (as he could not know from him) he has agreed for my brother to appeal for him to our Holy Father. I have to thank the bishop because it was against the exemption. He has responded to the appeal (what he had to answer before answering the requirements that were made by my brother) that he as apostolic commissary knew and understood to proceed ordering to move forward in his cause. My said brother's cause is now in this state. I, Sir, I think that by no apostolic commission the said exemption is revoked; I take as surreptitious his said commission, attended the clauses of the said exemption and the way of it; for which I have thought that I have to defend it and to be in it involved through this way, penetrating the Pope's commission of the said appeal, for which I beg V.A. to have the mercy of giving me a letter for his ambassador, and a letter for the Pope that would be fair to provide to me and to my said brother:

that if done in this way the Pope would have V.A. in much complacency. If the inquisitor had wanted to communicate to me his commission and would see that through it the exemption was revoked, there would not be any need for another altercation, that later in this point my brother and I would leave the exemption with him."

"This man is so cautious that for being so cautious and secret the justice is not done as it should be; and proves to treat me and my family with type and not with zeal. He goes very publicly that he closes and works to put in disorder everything that has been done in the Inquisition, even if he was judged and sentenced; from which is to think that no zeal was done if not other temporary cause more than a spiritual one; but I am not amazed, seeing the advisor he has, a friend of Quintanilla because of the causes that V.A. does not ignore, because you have heard it multiple times and from different people. And so "V.A. will not marvel if I defend myself against them with the said exemption; and where that were not enough, or if it were enough, because V.A. does not like to see this, I will work to get out of his courtroom by another remedy. Thus I beg V.A. not to be angered to grant me the said letters; or if V.A. does not want this, that the said bishop revokes the commission already dated to the said inquisitor from my causes and my brother's causes, and comments it to the bishop or to his officer *micer Tienda*, or to another person of good fame and science, because this way justice will be administered with zeal and how it is supposed to be, and not with the type of justice as it would be if it were administered by these persons."

"The notary of my process has never been able to see from the inquisitor my process for copying the sentence and sending it to V.A., but he has taken them out with the tricks he has had, and that I sent to V.A: authenticated and signed by all the lawyers who participated in it in order that you know how the sentence is acquittal, not suspended appeal; and it is passed in the authority of *res judicata*. I beg V.A. that in my brother's case you have the bishop writing to the Inquisitor the matter of *Aplacería* for outside of Aljafería or within it, and that I, my sons and sons-in-law can speak, and that it will be in the presence of the Inquisitor, or of whom he wants. I believe that he has sent the process to V.A. or to the bishop."

"I certify V.A. that if it is from Jews or not, it is not possible that others have testified: and I do not amaze myself by the Jews because as our enemies they have done it because of their expulsion, which was all attributed *to me*, because my brother was one of the commissaries deputed by V.A. to occupy their goods, for which they made me and him enemies and they conjured to make us false testimony, which is already proven, and it is very public in this city. With this I say and beg V.A. to write to master Martín García, master Crespo, and master Ros and inform them about what was said above."

"Some begging for the exemption of the goods of the accused deceased has been made to some deputies in this city, notwithstanding the concert that V.A. made with his children. The murmuring of it has been very big in charge of V.A. Lawyers were called to the council where I was called; I found all of the men reprimanding the exemption that was being made against the said concert: I was begged to say what I pleased; I told them that like V.A. moved what was done by force, it was very clear that by right the goods of the confiscated should not be returned to them, nor to their children, nor to other persons who were presumed to have a certain right, and that before the condemnation nothing could be done for their mercy."

"It seems that everyone fell more for the force of law than for its degree. But I was not in it even though I was called for another day: these good businesses that I have have given me so much to do that I haven't been able to be involved in others. Truth is that they sent me to tell of certain letter that is received as V.A., so it seemed to me, except in one thing, that if V.A. wanted me to pass on what was done, it could not be done in any other way than the pope dispensed, in this case against the law. I say this to V.A. according to his advice, and because I certify that of those who have defended the Inquisition I have always been one. I have done so in favor of the faith and due to the service of V.A. Pray to our Lord that for him there be a reward, that if V.A. doesn't send it to fix and repair, I will say what they say in this kingdom: *to good service bad reward, according to the decrees of Aragón*. Our Lord keeps and grows the health and royal estate of V.A. at length to his service From Zaragoza to XXVI of December of DIII."

"P.D. I will not stop saying to V.A. the admiration that in this city is having what is done to me and to my brother in parts where all is what V.A. commands; and seeing the quality and condition of ours, the reputation of Catholics and good Christians had our forefathers and have we, and seeing how servile we have been and are. Certainly Sir, in what they talk to me and importune me (because I see that they don't do it but to say bad things of me and of V.A.; of me for giving my services, of V.A. for not having memory of them) I tell you that V.A. with the zeal that he has of the faith, does not let up to anyone. With this answer I send them and they go satisfied. But with this answer V.A. will not comply with his servant, and so he would most certainly not comply with me. I don't say that to the heretic (as much as his servant would) as I would have to tolerate him in his heresy."

"Good God, spare me of such thing, for I dare to say to V.A. that those near to him and at his service (for it is true that they are in the opinion of good Christians) a different speech he must keep than with the others: it is good to know not to allow prison to those whom V.A. would not first allow the

process and recognize the witnesses and their fame and condition, and so also the accused. When V.A. has so much news of the persons, the truth or falseness will be known. And when it isn't sufficient to know, then the inquisitor should be sent and asked what he knows and feels; and if this would not be sufficient, send before proceeding to capture the person as to what has been informed of the fame and condition of the accused as to being a Christian or not; and with what would be ruled return to V.A. with it all and with some other that would provide what should be provided. If V.A. saw the witnesses of bad reputation, the denounce of good, and other circumstances of enmity, hate, or other causes that moved the witnesses other than that of zeal, it is certain that you would not allow it to proceed with the caption of such person. So it says in a decree which in this matter is a major instruction that the inquisitor has, and it starts by saying: *In fidei faverem* in the title *de Haereticis* in the sixth. It pleases me to dictate it in this way it conveys better what I say."

"And so that V.A. is not marveled because I say that with another care should V.A. speak of one case than of another, so teaches the law. The pope in the decree that starts: *Nisi* in the title *de Oficio legati* did not proceed to speak about the penalty of one who had committed a certain crime because he was your friend you did not want to give him the penalty that he deserved. So, Sir, it is not to treat the servant as the other even in justice; it can be proceeded by placing more diligence in one than in the other so that its truth is not hidden, and giving it the attributes that without lesion justice can give. That is why that singular king D. Henry who disrespected the king D. Pedro sent that of his servants no other would know but him. Therefore with great reason I beg V.A. provide in these deeds of mine, and of my brother as I beg, because it all be proceeds from justice; and without perverting it, V.A. can mandate it. So also the commissions that I request are all free will and just. I don't know how V.A. can deny them to your servant. Of V.A. a humble servant that your royal hands kisses,

JOANNES DE LUCENA

The brother to whom Juan Ramírez de Lucena referred was Carlos de Lucena. He was in the jail of the Holy Inquisition of Zaragoza.

The process of Inquisition of Juan Ramírez de Lucena has been lost and it is supposed that it has not been rescued from destruction, once the Counsel of Aragon determined the incineration of all existing

copies, in the square of the Zaragoza Market in 1622, being outlawed the following year by a Royal Sanction. Juan Ramírez de Lucena was not the only one who had motives to complain of the King. His motto *to good service bad reward, according to the decrees of Aragón* was a reflection of the truths of these years.

The text of this letter to the king is important in the bibliography of Juan Ramirez de Lucena and Jeronimo Miguel Briongos observed in his doctoral thesis¹⁴⁰ that the text was not written by Juan Ramirez de Lucena. This is correct and JGAAP showed that the text was written by his son Lucena. We have explained the characteristics and usage of JGAAP¹⁴¹ in an article about *Lazarillo*. We used the following possible authors in this program for detecting the authorship of the letter addressed to king Ferdinand:

Alonso de Cardona (*Question de amor*)

Alonso de Proaza (*Some of his texts*)

Diego de San Pedro (*Arnalte y Lucenda; Cárcel de amor*)

Fernando de Rojas (*some texts from his testament in 1541*)

Francisco López de Villalobos (*Costumbres humanas*)

Hernando del Castillo (*Cancionero*)

Juan Ramirez de Lucena (*Vita Beata and other works*)

Juan de Flores (*Grimalte and Grisel*)

Juan del Encina (*Complete works*)

Lucas Fernández (*Autopasion and De reniego del amor*)

Lucena (chess book, *Arte de Ajedrez*, 1497; different parts of *Repeticion de amores* and the letter of Lucena in 1503 to King Ferdinand)

Luis de Lucena (*some texts from his testament in 1552*)

Here it is clear that the linguistic style is not Juan Ramírez de Lucena's and the letter was written by a different person. We observe that according to JGAAP the person who wrote this letter was Diego de San Pedro, a pseudonym of Lucena.

5.3 Conclusion

Rolf Eberenz detected the specific linguistic style of Lucena and according to his findings we could detect a lot of similarities between *Repetición de amores* and *La Celestina*.

Thanks to the work of the late and mourned Rubio García, professor of the University of Murcia, and the JGAAP program we could conclude that the first 6 acts of *La Celestina* came from the pen of Lucena.

Ana Vian also detected certain words in works that according to her could be a significant feature. Applying her suggestion we observe the repetition of certain erroneous verbal conjugations by Lucena in various works.

Thanks to the knowledge of chess we know that before 1500 Lucena had already visited Ferrara where he had a good position thanks to the past activities of his father.

Francesch Vicent (Lucena) is the Aragonese author of the first six acts of *La Celestina*; for the remaining acts he had the help of Juan del Encina. However, Lucena controlled the whole work as he had the financial means.

6 Hernando Díaz, a pseudonym for (Lucena)

Francesch Vicent wrote a chess book in Valencia in 1495 and shortly thereafter appeared a chess book of Lucena in Salamanca in 1495. According to our research Francesch Vicent was Lucena, the son of the protonotary Juan Ramírez de Lucena who was an ambassador of the Catholic Monarchs. His father and other members of the Lucena family had to suffer the actions of the Holy Office and this was probably the reason why Lucena looked for better future in Italy. As we know, Francesch Vicent (Lucena) stayed in Ferrara for several years to give chess lessons to Lucrecia Borgia. There he used the name Francesco. Then he went to Rome where he was working as scribe, presumably by the nickname of Il Vicentino, alias Ludovico Vicentino degli Arrighi¹⁴². This study aimed to prove that the JGAAP program can also reveal the hand of Lucena if the manuscripts or books are written by pseudonymous writers. This is the case of the author Hernando Díaz, who in reality is Francesch Vicent (Lucena).

Seeing the printing activities of Lucena, Lucena could have been involved in the translation of other Italian books and so we studied the books in relation to Ferrara and the years 1505, 1506, 1507, and 1508. Suddenly we saw that there was a book *Il Peregrino* that came from Ferrara in 1508 written by Jacopo Caviceo. It was translated into Spanish by Hernán Díaz who was a resident of the University of Salamanca. This matter is quite suspicious, because the author immediately let us think of the books of *La Celestina*, *Propalladia*, and *Lozana Andaluza*, which had to do with the University of Salamanca and Nebrija.

6.1 Detection by JGAAP

Seeing that there was little known about Hernán Díaz it was clear that this author could be Lucena. This was confirmed by JGAAP:

However, the situation is similar in case of the prologue of 1803 words. Firstly, here we see a different author from Lucena again. The name of Diego Hurtado de Mendoza appears. As we know, Diego Hurtado de Mendoza was a friend of Luis de Lucena. It may be reasonable to suspect that he was involved in the printing of several books in Spain coming from the pen of his friend Lucena.

Jacopo Caviceo (1443-1511) must have known our Lucena (Francesch Vicent) and the work of *La Celestina*¹⁴³ in Ferrara when he composed *Il Peregrino* in 1508 and dedicated this work to Lucrezia Borgia.

According to the historians the Spanish translation of Jacopo Caviceo's work *Il Peregrino* of by Hernando Diaz with the title *Libro de los honestos amores de Peregrino* was printed by Jacobo Cromberger at Seville in 1527. There were also printings in the years 1544 and 1548.

The book was translated into French by François Dassy, a lawyer and secretary to Henri d'Albret, King of Navarre. The first French edition appeared in Paris in 1527 - at a time when there would have been considerable interest in Italian matters among French readers, and no fewer than ten further editions were published in Paris or Lyons in the next thirteen years. Dassy made no attempt to modify the passages of the original which deal specifically with Italian figures, settings, or customs in order to make the work more accessible to the French readership. His translation appears to be complete and faithful, and does not conceal the identity of the original author. This was not the case with the Spanish version¹⁴⁴.

The influence of the work of Calisto and Melibea is noted throughout the work and there is no doubt that Caviceo had contact with Lucena (Francesch Vicent) in Ferrara. Clive Griffith let us know the following in this respect:

The title-page of the c. 1515 Spanish *Peregrino* stressed that the loves of Peregrino and Ginevra 'por dialogos largamente se cuentan' and, as we have seen, lively dialogue between the characters is indeed a striking, if not consistent feature of the work. Ironic and realistic dialogue is also one of the most original characteristics of *La Celestina*, although it is more skilfully handled by Rojas. On the other hand the title-pages of the Cromberger and other Spanish editions of *La Celestina* advertise its sententiousness and stylistic excellence in terms very close to those we have already encountered in the editions of the Spanish Peregrino: Rojas's work, we are told, 'contiene de mas de su agradable y dulce estilo muchas sentencias philosophales'. These printers' announcements suggest significant parallels between *La Celestina* and the *Peregrino*. But there are other notable common features. One of them is a concern with legal matters: while at one point in *La Celestina* Calisto discusses in some detail the justice or injustice of a sentence passed on his servants, Caviceo includes in his work two long and involved court cases. It is not for nothing that Rojas, Caviceo, Dassy the French translator, and possibly Díaz, had all been law students. The legal training of

the two authors would have given them a practical familiarity with the techniques of rhetoric, and this is evident from the numerous rhetorical set-pieces and carefully wrought passages of persuasion which are found in their works. In both, however, these passages, and indeed their typically forensic use of *sententiae*, *exempla*, and learned allusions to bolster the arguments they put in their characters' mouths, are often ironic, for they are a means of justifying lust, greed, selfishness, or even crime by a perverse appeal to unimpeachable authority. Indeed, both authors even go as far as to make implicit criticisms of the workings of the law. Moreover, courtly language is frequently an ironic cover for the least courtly of intentions, and servants in both works show their impatience with their masters' verbosity. Similarities between *La Celestina* and the *Peregrino* are plentiful: both deal with the ill-fated love of a nobleman for an initially inaccessible lady; both contain entertaining and often comic passages of an intense eroticism; in both we see the dire results of servants' greed; both are largely concerned with the unexpected but inescapable reverses of Fortune, with deceit, 'mad' love, and with their consequences. Nevertheless, a comparison of the two books cannot but leave the reader dissatisfied with the prolixity, inconsistencies, and occasional incoherence of Caviceo's composition. It may be for this reason that Díaz chose to streamline the end of his version of the He cut out several of the final Chapters with the result that it becomes far more dramatic: Ginevra's death with the result that it becomes far more dramatic: Ginevra's death is now closely followed by that of her lover just as Melibea in *La Celestina* takes her own life soon after the death of her Calisto. It would be misleading to pursue these parallels too far. *La Celestina* and the *Peregrino* are very different works. This did not, however, prevent Díaz (or his publisher) from doing his best to emphasize their similarity. As the potential purchaser opened the Spanish *Peregrino*, the first words he encountered after Díaz's prologue were 'Comienca Peregrino despues de rogado a querer contar el processo de sus amores: los quales cuenta el auctor por dialogo a imitacion delos de Calisto y melibea con mas honestidad aunque menor elegancia'; as he turned to the end of the book he found not Caviceo's final chapter, which Díaz had suppressed, nor even an accurate translation of the last sentence of his penultimate chapter, 'Et cosi dicendo lanima exhalai', but rather 'E assi diziendo salio mi anima de aq[ue]ste lachrimarum valle', a clear echo of the final words of *La Celestina*, '¿Por que me dexaste triste y solo in hac lachrymarum valle?' Printers and authors in sixteenth-century Spain did much to capitalize on the extraordinary publishing success of *La Celestina*; Díaz here appears to be doing the same¹⁴⁵.

Lucena probably had something to do with the translation of this work into Spanish or Caviceo copied his manuscript. Logically speaking, historians could thus never determine the biography of Hernán Díaz, the alleged translator of the Spanish work in 1516 known as *Libro de los honestos amores de Peregrino y Ginebra* and preserved in the Royal Library of Madrid. Quite interesting to see is that this factitious work IX / 7047 of the Royal Library of Madrid known as the Palacio's volume bears two poetic compositions of the Mur, at the end which were probably written by Hernando Díaz in 1516.

The type of letters, which can be seen in the herebefore presented image, are similar to those of Ludovico Vicentino degli Arrighi. But again, this needs to be confirmed by the experts. The great expert professor Martin Antonetti was very helpful on 18 October 2016 and with respect to the *Couplets of the Mur in Palacio's* factitious work he informed me that the calligraphy of Hernán Díaz is similar to Ludovico Vicentino degli Arrighi's.

al Acarte venir: con tanto poder
creçieron sus fuerças, su manya y saber,
y ya la vitoria por çierta tubieron.

Más presto que nadi lo pudo pensar 65
vieron el muro, que fue derribado,
y al valiente Acarte, muy denodado,
en medio los moros herir y matar.
“¡Vitoria! ¡Vitoria!”, comiença a llamar.
Siempre de todos el más delantero 70
passando por ellos como un Cançervero,

JGAAP detected the author of the couplets of 694 words as Juan Ramírez de Lucena. If this is true, this means that Lucena could have had his father's texts at his disposal.

Farsa nuevamente trovada por Fernando Díaz. En la qual se introduzen tres pastores llamados Juan Casado, Antón Bodigo, Pero Grullo, y un Ángel. La qual farsa, demás de ser muy graciosa, habla en loor del nascimiento de Jesu Christo. Entra primero Juan Casado.

JUAN

¡Harre por medio, qué necia criança,
que aun un Dios mantenga no puede atinar!
Pero a la buelta lo quiero adobar,
¡sí, por la gloria de sancta Costança!
Y aunque me veis tan ancho de pança,
tampoco penséis burlar del mocito;
mirando mis gracias y talle de hito,
veréis que Quirino os dará mi esperança.
¡Mirá el cabellito, qué bien alheñado!
Paresce montón de corchetes o anillos,
pues los menchones son mocosillos,
y dó al diablo el pende que ogaño he tomado.
El un ojo chico, el otro hinchado,
¡miráme también, si os praze, las cejas,
que en las narizes mi ható de ovejas
lo más del agosto lo tengo apriscado!
¡Ojo, qué boca también para pan!
Dos o tres libras cabrán de una vez.
Pues las tinajas, hata la hez,
en muy pocas vezes porné, ¡juro a san!
El talle del cuerpo, mejor que cotán,
los braços y piernas, aunque estevados,
¡juro a san Pego! los más ahuziados,
si yo me enerizo, ventaja me dan.
Yo y Toribuela, la hija de Antón,
assí en poca cosa mos imos queriendo,
doquier que me vee arremete corriendo
y luego me assienta un buen bofetón.
Mas no me tengáis por tan bovarrón,
que ella tampoco se vaya quexando.
Doquier que la apaño, la llevo rastrando
y coce y puñada y buen repelón.
Entra Antón Bodigo y dize
ANTÓN ¡Ha, descuidado, llóbado te mate!
¿Que nunca al ganado cuidas tornar?
JUAN Quiçás os serié partido callar.

ANTÓN ¡Catá que se enoja en oír su dislate!
 JUAN ¡Andá, modorro, tú y tu debate,
 cuido quellotras qu'é estado durmiendo!
 ANTÓN ¿Cómo barruntas que yo no te entiendo?
 Tú buscarás que mi llengua desate.
 JUAN Agora estuviesses tan desatado,
 que tripas ni carne ni hueso ni cuero
 ni las coyunturas ni el meollero
 ni puedan tenerse ni esté concertado.
 ANTÓN Y tú que te veas contrecho de un lado
 y el otro tan largo que en parte no quepas,
 y lo mejor y más cierto: que sepas
 cómo tu hembra te haze venado.
 JUAN Tuviesses, carillo, tan huerte prazer
 como el que tienen por mayo las flores.
 Dios te guarnezca de tantos dolores
 quantos tu cuerpo podrá sostener.
 ANTON Manos ni pies no te puedan valer,
 vayas como odre por tierra rodando,
 perros y alanos te vayan ladrando,
 y todos te lleguen de huzia a morder.
 JUAN Fáltente ojos e dientes y boca,
 mexillas, pestañas, cejas y oídos.
 Todos tus miembros estén descosidos,
 abundes en daño y holgança muy poca.
 ANTON ¡Do al diablo llengua tan loca!
 Seca la tengas e a un lado pegada.
 Quiças que por pago de tanta porrada
 te avré de frocar muy bien essa coca.
 JUAN ¡Huy, qué prazer! ¿Pensáis que me espanto?
 No lo creáis que soy tan medroso.

ANTÓN ¡Andá, modorro, necio, baboso!
 ¡No te arrebate!
 JUAN ¡Tomá dun avanto!
 Con esso estaréis agora entre tanto,
 casi en lugar de pan y cebolla.
 ANTÓN ¡Ay, que me ha quebrado la cholla!
 ¡Tomá vos también! ¡Repártase el llanto!
 JUAN ¡Ay d'ora mala que tirria tomastes!
 Aun bien os podrié costar la pelleja.
 ANTÓN ¡Andá para burro, cevil hi de vieja,
 que todo este griesgo vos lo causastes!
 Mas y'os aprometo que poco ganastes,

si vuestros mastines puedo apañar,
 a panderetes los he de tusar,
 para en venguijo de qual me parastes.
 Entra Perogrullo y dize
 PEROGRULLO ¿Y qué es el cordojo, dezidme, carillos?
 Ya no aya más, si dambos queréis,
 son que de grado las manos os deis.
 JUAN A mí que me praze y aun de tovillos.
 ANTÓN Tampoco yo quiero guardar homezillos,
 echá acá la mano, sin más dilatar.
 PEROGRULLO Agora nos vamos a repantigar
 a nuestra cabaña, sendos poquillos.
 JUAN ¡Válame Dios! ¿Y qué será aquello?
 Yo nunca vi tan gran maravilla;
 dezí, compañeros, no veis qué quadrilla
 va por el soto?
 ANTÓN ¡Yo tiembro de vello,
 todo se me ha erizado el cabello!
 PEROGRULLO A mí no, pardiez, que en su gestadura
 gente parece de allá del altura,
 aunque el quillotro no puedo entendello.

Prosigue

Por más que percato, no puedo otear
 de dónde procede tan gran rellumbrorio;
 no hallarán en historia ni historio
 tiempo ni cosas tan de ñotar.
 Yo digo y hairmo que osasse apostar,
 que este es el día de nuestra salud,
 el qual prometió la summa virtud
 que avié de venir a nos visitar.
 JUAN ¿Y quién es aquél que viene bolando?
 ¿Cómo que no mos avrá de assombrar?
 ANTÓN Dexa, carillo, tu vano habrar,
 y atina que dulce viene cantando;
 tanto me abucho de estallo escuchando,
 que, juria la grulla, por más agradalle
 quijera tener mil cosas que dalle,
 por servirlo luego en llegando.
 Llega un Ángel cantando un villancico
 Esta es embaxada
 muy grande entre las mayores;
 ¡dadme albricias, peccadores!
 Esta es mensajería

y embaxada de notar:
nadie se piense salvar,
si contra aquesta porfia,
sabe que oy, en este día,
parecieron nuevas flores;
¡dadme albricias, peccadores!
Prosigue el Ángel razonando
¡Gloria en el cielo y tierra y alcores
a Dios, que acatando su inmensa bondad,
ha celebrado la conformidad.
entre nosotros y los peccadores!
Paz a vosotros, simples pastores,
y a todos aquellos que huyen discordia,
sabé que es hecha la grande concordia,
que está muy pedida con tantos clamores.
PEROGRULLO Vengáis en buen hora, garçón repolido.
ÁNGEL Y todos vosotros en ella lo estéis.
PEROGRULLO Por hernos mercedes, que nos recontéis
todo el negocio cómo aconteció,
que, mi fe, el quillotre de nuestro sentido
nos haze entender que aquesto es gran bien,
según los passados prophetas dezién
y agora de vos avemos oído.
ÁNGEL Mucho me plaze de daros razón
y soy a lo mesmo de Dios embiado.
Ya avréis sabido del triste bocado
y las condiciones de la trasgressión:
fue la primera la rebelión,
segunda la offensa a la summa bondad,
tercera la culpa en mayor calidad,
la quarta desorden sin comparación.
Fue una conserva que no es de contar
un triste manjar tan emponçoñado
que avemos por cierto y determinado,
que Adam no pudiera mas grave peccar;
lo qual fácilmente se puede gustar,
según lo veréis en mil partes escripto,
y el género humano por ello precito,
si Dios no quisiera después abonar.
Prosigue
En Dios poderoso dos cosas notamos
entre otras tantas que lengua no basta,
las quales obrando jamás no contrasta,
según por verdad notoria hallamos,

y son estas dos que aquí señalamos:
la reta justicia y la misericordia,
y huídas assí en tan eterna concordia,
que unas sin otras no tiene de sus ramos.

Assí que la culpa de Adam nos declara
que, siendo por ella in eternum perdido,
fuera conforme a su merescido
y justa justicia en ello se obrara;
misericordia en esto faltara,
y esta sin dubda no puede faltar,
a he que justicia se ha de buscar
que haga compañía a su hermana muy cara.

Prosigue

Pero si ussando assuluto poder
quisiera el Señor la culpa lavar,
no dude ninguno ni debe dudar
que lo pudiera sin falta hazer;
luego notá que avéis de saber
que misericordia sola se obrava
y la justicia no acompañava
faltando la orden en el proceder.

Assí que acordó por nuestro provecho
el gran consistorio de la Trinidad
que lleve esta obra la conformidad
que llevan las otras que haze y ha hecho;
y porque quede Adam satisfecho,
por misericordia se ha comprado
y por justicia, según es notado,
darse a sí mesmo, qu'es precio derecho.

Prosigue

Aora entre dos la deuda ha quedado
haziendo de entrambos un buen pagador:
de Dios el querer, la gracia y amor,
viniendo en el mundo a ser encarnado;
del hombre un arnés o saco abrochado
en que reciba los golpes y afrenta,
del nombre el papel do se tome la cuenta
y Dios el que abone el processo cerrado.
Muchos han visto dende Luzbel,
por unas delgadas revelaciones,
que el rey de los tronos y dominaciones
avía de encarnar acá en Ysrael,
y que su vida sería nivel

de quantos trabajos se pueden pensar,
 y que a la fin avié de escotar
 el amargo bocado más que la hiel.
 PEROGRULLO Quantis que aquesso, acá lo sabemos,
 según por lleturas autentas²¹ hallamos;
 dezí, si queréis, lo que acá no sepamos
 si avéis entendido lo que queremos.
 JUAN ¡Y an de rodillas lo reserviremos,
 si quiere hazernos tamaño prazer!
 ÁNGEL Gran atención avréis menester
 para lo dicho y lo que diremos.
 Después que ya hubo Adam conocido
 su culpa y remedio y de dó procedía,
 con grandes amores rescate pedía,
 pero no era el tiempo cumplido;
 pidiólo también Noé el escogido,
 aquél qu'el dilluvio puso en affán;
 pidiólo también el justo Abraham,
 Isaac y Jacob, Ysrael entendido,
 Moysén, Josué, David, Esaias,
 Elías, Natán, Abauch, Daniel
 y otros muchos del gran Ysrael,
 el último fue el buen Zacharías;
 todos aquestos gastaron sus días
 pidiendo socorro del cielo y alturas,
 y muchos escriven notables figuras
 que tocan aqueste divino Mexías.
 Prosigue
 Aquesta señal la paloma llevaba,
 al arca tornando do estava primero;
 este es aquel divino cordero
 que el gran sacrificio de Isaac figurava;
 la çarça que ardía y no se quemava,
 este es el fructo que darnos tenié;
 esta es la flor de radice Jessé,
 esta es la sierpe que el pueblo acatava.

PEROGRULLO Dezidnos agora, mancebo bendito,
 quién ha parido a este zagal,
 que, mi fe, barrunto que debe ser tal,
 pues ha sido madre de Dios infinito.
 ÁNGEL No basta memoria ni lengua ni escripto
 para notar siquiera los puntos:

más que los hombres y ángeles juntos
 tiene grandezas, Pedro, yo's lo prometo.
 Buelen por alto los cinco sentidos,
 abra los ojos el entendimiento:
 en ella hallamos el gran cumplimiento
 para las sillas de los escogidos;
 en ella camino los tristes perdidos,
 en ella el favor de nuestros favores,
 en ella el tesoro de los peccadores,
 que Dios se lo ha dado por modos subidos.
 PEROGRULLO Dezi qué diremos de aquesta donzella,
 que el cielo se admira de su hermosura.
 ANGEL Es tesorera del rey del altura,
 el qual es su hijo y mora con ella.
 No tuvo culpa ni pudo tenella,
 bendita entre todas de gracia cumplida,
 es la triaca que truxo la vida,
 es por quien cessa la larga querella.
 Avemos holgado tan por entero,
 que Dios reconosce quanto nos lleva
 oyendo cantar las grandezas y nueva
 del hombre perfecto y Dios verdadero.
 JUAN También gradezcamos al buen compañero
 que Dios ha dotado de gracia y aliño.
 ANTÓN Agora nos vamos a donde está el Niño.

ÁNGEL Vamos, hermanos, por este sendero.
 PEROGRULLO Pardiós, no veo la hora de vella
 de hinojos en tierra, humilde, adorando
 aquella que puede estar contemplando,
 que es virgen y madre y esposa y donzella.
 ANGEL Delante la mies, que fue sin hemella,
 delante del fructo no maculado
 que el sol en su pecho se ha aposentado
 a otros abunda con una centella.
 Exclamación
 PEROGRULLO ¡Ha, sereníssima Reina del cielo,
 tal que Augustino te halla sin par,
 hazme, Señora, que pueda gustar
 siquiera tantico que tome consuelo!
 Y por mostrar mejor mi recelo,
 yo me conozco ser peccador,
 sé que no has de negarme favor,
 aunque soy pobre y mendigo hijuelo.

JUAN Ya yo querría, carillos, llegar
 por ver en el heno puesto a mi Dios
 y ver el cuidado que tienen los dos,
 María y Joseph, en el Niño agradar.
 ÁNGEL Tú lo verás y aun de frío llorar
 en pobre posada y con ricos pañales,
 tiene de cerca dos animales,
 los cuales procuran de lo escalar.
 Exclamación del pastor segundo
 JUAN ¡O Emperador de las gerarchías!
 ¿Cómo te tratas con tanta pobreza?
 No sé quién quiere mundana riqueza,
 huyéndola tú, que mejor la ternías;
 el Verbo divino, en el qual tú confías,
 puso en tu alma tan claro sentido
 que sepas dexar lo que es prohibido
 y en todo lo bueno que sigas sus vías.
 ANTÓN Pues aunque callo, también yo querría
 aver concluido aquesta jornada,
 por ver cómo da la teta sagrada
 al niño Jesús la gloriosa María.
 ÁNGEL Tú gozarás de tal melodía,

y quando lo empaña y lo quiere acallar,
 que a solo su canto no puede igualar
 la celestial ni mundana armonía.
 Exclamación del tercer pastor
 ANTÓN ¡O Mater, gracia e misericordia,
 dime do avrá tu mente bolado,
 viendo lo mucho que has alcançado,
 viendo que cessa nuestra discordia,
 viendo ya hecha la grande concordia,
 viéndote madre de Dios infinito,
 viéndolo hecho niño chiquito
 [. –ordia]
 PEROGRULLO Vamos, carillo, sin más dilación,
 que veis el portal tenemos orilla31.
 JUAN ¡O Dios verdadero, y qué pobre casilla!
 ¡Nunca te hubo siquiera un mesón!
 ÁNGEL Esto se hizo por más confusión
 de los que tienen bienes sobrados,
 en especial si son malgastados.
 ANTÓN Agora dexemos aquesta cuestión.
 Adoración del Ángel

ÁNGEL Ante tu alta y gran magestad,
¡o soberano y eterno Señor!
yo me conozco por tu servidor,
lo qual alcancé por tu inmensa bondad;
yo he demostrado la gran novedad
entre tu pueblo, si oírlo quisiere,
y digo y affirmo que quien lo creyere,
hará su provecho y hará lealtad.

Ofresce el pastor primero

PEROGRULLO Con alma y con cuerpo, y con todo el querer,
yo me remito, Señor, a tu audiencia,
y pido remedio a mi grande dolencia,
pues solo por ti podrá guarescer;
y nada no tengo más que ofrescer,
sino este cinto, honda y esquero,
y dos agujetas y aqueste pandero
con que podáis a ratos tañer.

JUAN Yo os acomiendo quanto posseo;
a vos, sancto Niño, que sois buen pastor,
suplico's, humilde, miréis con amor
al género humano, el qual fue muy reo,
y do's en presente, por joya y empleo,
lazos y perchas y un cucharal,
y este presado fresco sin sal,
y dos camisitas y más mi desseo.

ANTÓN Aquí me promito y hago obrigado,
de en todo y por todo seguir vuestra vía,
y vos conoscéis lo que daros quería
y lo que tengo os do con cuidado;
qu'es es lo primero aqueste cayado
y estas abarcas, si avéis menester,
y luego en quadrilla por heros prazer
aquí cantaremos en tono acordado.

Canción

Villancico

Tiempo es ya que se destierre
la guerra de nuestra guerra,
pues la paz está en la tierra.
Tiempo es ya de despertar
de nuestro sueño pesado
y que pongamos cuidado
donde más ha de durar;
ninguno podrá ignorar
que nuestro mal se destierra,

pues la paz está en la tierra.
Laus Deo

We now also add the book and foreword of Hernán Díaz of the *Libro de los honestos amores de Peregrino y Ginebra* to the list of possible authors in JGAAP. If *La Farsa* of 1554 is indeed written by Hernán Díaz, JGAAP will surely detect this.

Is Hernán Díaz also the author of the farsa of 1554 that was written by an author known as Fernando Díaz?

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |

| Tinelaria – Francisco Delicado | | | | 2 | 5 | 7 |
| Diego Hurtado de Mendoza | 3 | 1 | 1 | | | 5 |

As we can see from the above table, the Farsa of 1554 has nothing to do with Hernán Díaz. Never do we see Hernán Díaz listed in this table.

As indicated in Chapter 2, JGAAP could not detect Hernán Díaz as author of *La vida y excelentes dichos de los mas sabios philosophos que hubo en este mundo* that was published on 15 March 1516 by Cromberger in Sevilla. Here JGAAP indicates that the work has more of the linguistic style of authors such as Francisco López de Villalobos and Juan del Encina.

Is Hernán Díaz the author of the 747 words of *La Vida y excelentes dichos de los mas Sabios Filósofos que uvo en este mundo*?

With regards to the work of *La vida y excelentes dichos de los mas sabios philosophos que hubo en este mundo* Díaz maintains that he made a complete translation of the *Divine Comedy* into Castilian. However, the work has been lost.

The Dante and Petrarch translations of Hernando Diaz consisting of the opening passage of each cantica are appended to his *La vida y excelentes dichos de los mas sabios philosophos que uuo en este mundo*. The text of the Cromberger, 1541 edition reads as follows¹⁴⁸:

Citing Farinelli's criticism based on the availability of only the first two verses of each canticle of Dante's *Commedia* as translated by Díaz, Professor Selig reproduces, from the appendix of a 1541 work, longer extant passages of Díaz's otherwise lost translation, so that a more adequate judgment may be possible.

Al medio camino de nuestro biuir
halle me por una gran selua y escura
quel recto viaje con tanta espessura
estava remoto sin ver por do yr.
No ay cosa tan rezia qual era dezir
la selva salvagia tan aspera horrible
la qual me renueva un miedo terrible
pensando en la vida que quise seguir.

Y tanto es amarga que poco es mas muerte
mas yo por trataros del bien que ay falle
dire de otras cosas de forma y de suerte
que diga de quanto por ella alcance.
No se bien narraros del modo que
entre tan lleno de sueño estaua y turbado
encima del punto mas alto encumbrado
que el muy verdadero camino dexe.

Principio del canto primero de la segunda cantica:

Hoy mas nauezilla de pobre saber

¹⁴⁸ SELIG, Karl Ludwig (1960) *The Dante and Petrarch Translations of Hernando Díaz*. In: *Italica*, 37/3, pp. 185-187

que atras de ti dexas el mar truculento
leuanta las velas cobrando tal viento
que puedas por agua mejor ya correr
por donde sin otra tardanca poner
yo cante los cantos del reyno segundo
a donde se purga el espiritu immundo
y digno se buelue del cielo tener.

La muerta poesia aqui resuscite
o musas muy sanctas: o choro radiante
pues todo soy vuestro muy bien se permite
que un poco se alce caliope adelante
siguiendo mi canto melifluo sonante
formando aquel son del qual ya sintieron
tal golpe las tristes picaças que fueron
que nunca esperaron la venia bastante.

Canto primero de la tercera cantica del parayso:

La gloria de aquel que todo lo mueve
por el uniuerso penetra y reluze
en una y en otra parte produze
su luz relumbrante mayor o mas leue
al cielo que mas de su luz embeue
yo fuy do vi cosas tan altas que cierto
ni sabe ni puede narrar su concierto
aquel que de arriba su mente remueue.

Porque acercandose a su dessear
el nuestro intellecto ahondase tanto
que nuestra memoria no puede allegar
detras del siguiendo y pierdese en tanto
mas quanto tesoro del reyno muy sancto

mas quanto tesoro del reyno muy sancto
de dentro en mi mente pudiere hazer

sera la materia que quiero poner
agora por cierto eneste mi canto.

It is interesting to note here that following his Dante translation, Díaz also gives his translation of Petrarch's sonnet:

Soneto de Petrarca traduzido en Castellano que en Toscano comienza:

Se amor non e: che e dunche.

Si amor no es aquesta: pues ques lo que siento
mas ay si es amor que cosa es y qual
si es buena por donde el etecto mortal
si es mala porque tan dulce el tormento

si ardo de grado porque descontento
si a mal de mi grado que vale el llorar
o muerte muy viva o dulce lamento
en mi como puede si yo no consiento
mas ya si consiento no es justo el quejar
con vientos contrarios me hallo en el mar
en flaca barquilla sin otro gouierno
ligera en saber cargada en errar
que no se yo mesmo que quiero alcançar
temblando en estio y ardiendo en inuierno.

The verses of the two poems have 481 words, which is sufficient for a JGAAP analysis. We see in the table that the first place with a great difference belongs to Alonso de Cardona. In other words these verses have nothing to do with the translator Díaz. It seems more likely that Díaz appropriated other works for printing purposes.

Is Hernán Díaz the translator of the verses of the two poems of Dante's *Comedia Divina*?

| Names | N:1 | N:2 | N:3 | N:4 | N:5 | Total |

The obtention of these results as indicated in the various tables is fully described in the Appendix Chapter 6.

6.2 The linguistic proofs

6.2.1 The first proof

The language of Lucena's *Repetición de amores* (1497) is somewhat archaic, so that one automatically speculates on the father's authorship. By somewhat studying the language Rolf Eberenz showed us that the examples of *tendr...* and *vendr...* in the literary texts are few¹⁴⁹, but Lucena, son of the protonotary Juan Ramírez de Lucena, is one of the few authors who uses them in *Repetición de amores*. Consequently the way of writing in this way will be an excellent additional tool to find out possible works of Lucena. And by applying this tool we saw a lot of our hypotheses confirmed in previous years:

We see the same thing appear in *El Peregrino*: *vendr...* (18 times) and *tendre...* (44 times).

* In posssion of Fernando de Rojas

It is clear that this table is not enough to be sure that some of these works were indeed written by Lucena, because it only gives us an additional proof. However, the advantage of this table is that it indicates the path that we should follow in our research.

It appears from this table that Hernán Díaz, author of the work *El Peregrino*, is a pseudonym for Lucena.

6.2.2 The second proof

Studying the works of Rolf Eberenz we observed another linguistic proof that could tell us much more about Lucena's way of writing. It has to do with the conjunction of *ya que* - a form that was used very little, and of which the inventor was allegedly Diego de San Pedro. This is extremely important, because if this conjunction is little used and Diego de San Pedro was its inventor, then with some good luck this form of writing could be found in Lucena's other books. Here we partially mention the text of Eberenz¹⁵⁰:

Ya que

This conjunction is from a relatively late date; in the temporal meaning of coincidence or posteriority it is found for the first time in Diego de San Pedro. We think that the form *ya pues que*, documented in *El Cid* (v. 2.66r) and cited by Rivarola¹⁵¹, should be interpreted rather as an expansion of the basic type *pues que*, that was very frequent at that time. The primitive meaning of *ya que* seems to have been precisely the temporary, from which would derive the causal - today the most common - and the concessive form, more sporadically used¹⁵².

“y *ya que* con mucho trabajo llegamos a lo alto della (s. de la sierra), acabó su respuesta” (San Pedro 118)¹⁵³.

We have a lot of works in our database that could have been written by Lucena. These works are listed in the following table. Most of them are complete, but we also have books that are not complete, which makes it more difficult to form a final opinion.

Fortunately *El Peregrino*, the object of our study, is complete. We observe that *ya que* occurs four times, which is another proof that this book could have been written by Lucena.

6.2.3 The third proof

The word *aqueste* figures in various works of the 15th century and among them is Lucena's *Repetición de amores* according to Rolf Eberenz¹⁵⁴. Did Lucena continue this way of writing in some of his works?

Occurrence of the word *Aqueste* in some works

| Año | Author | Book | Aqueste | Fernando de Rojas |
|------|------------------------------|--------------------------------------|---------|-------------------|
| 1483 | Enrique de Villena | <i>Los doce trabajos de Hercules</i> | 29 | |
| 1497 | Lucena | <i>Repetición de amores</i> | 4 | x |
| 1511 | Francisco Vázquez | <i>Palmerin de Inglaterra</i> | 4 | |
| 1516 | Hernán Díaz | <i>El Peregrino y Ginebra</i> | 186 | |
| 1517 | Bartolomé Torres Naharro | <i>Propalladia</i> | 12 | x |
| 1519 | González Fernandez de Oviedo | <i>Claribalte</i> | 28 | |
| 1527 | Alonso Hernández Alemán | <i>Guarino mezquino</i> | 4 | x |
| 1530 | Francisco Delicado | <i>Lozana Andaluza</i> | 2 | |
| 1537 | Anonym | <i>Lazarillo</i> | 4 | |
| 1552 | Alonso Núñez de Reinoso | <i>Clareo y Florisa</i> | 14 | |

We have to be very careful, because other authors such as Juan del Encina also used the word *Aqueste*. We need additional linguistic proofs before awarding any work to Lucena.

¹⁵⁴ **EBERENZ, Rolf** (2000) *El español en el otoño de la Edad Media*. Gredos, p. 250

6.2.4 The fourth proof

It is curious to observe that the word *vos* is not used in *La Celestina*, *Siervo libre de amor*, and *Cárcel de amor*¹⁵⁵. We encounter the use of the word *vosotros* in *Repetición de amores* as well as in *La Celestina*. Lucena liked to use this word more than other authors and this can give us an indication of the anonymous works that could have been written by him. In this sense we refer to the anonymous author of the manuscript *Diálogo de la lengua* of which experts think that it was written by Juan de Valdés.

His father Juan Ramírez de Lucena used this word on 6 occasions in a very short text. Consequently his son Lucena was used to this word.

6.2.5 The fifth proof

There were several words in Juan Ramírez de Lucena's *Vita Beata* that were used in his son Lucena's books. One of them is *Peregrino y Ginebra* and this is another proof to unmask Hernán Díaz.

Occurrence of the words *deleyte* and *deleite*

6.2.6 The sixt proof

Another word that Lucena used and other authors normally did not was *punido*. We find it in his various works, among them *Peregrino y Ginebra*.

Occurence of the words *punido* and *punidos*

| Año | Author | Book | punido punidos | Fernando de Rojas |
|------|------------------------------|---|-------------------|----------------------|
| 1444 | Juan de Mena | <i>Laberinto de Fortuna</i> | 1 | |

| 1537 | Ludovico Escrava | <i>Tribunal de Venus</i> | 1 | |
| 1552 | Anonym | <i>Lazarillo</i> | 1 | |

6.2.7 The seventh proof

The word *bello púnico* is used solely by Lucena and curiously enough we find the word *púnico* *Haníbal* back in the foreword of *Peregrino y Ginebra*.

| Año | Author | Book | púnico | Fernando de Rojas |
|------|-------------|-----------------------------|--------|-------------------|
| 1497 | Lucena | <i>Repetición de amores</i> | 1 | |
| 1516 | Hernán Díaz | <i>Peregrino y Ginebra</i> | 1 | |

6.2.8 The eighth proof

So far we could analyse the subjunctive expression “des lugar” only in a few books. We see the linguistic style of Lucena in most of them.

Occurence of the subjunctive expression “des lugar”

| Año | Author | Book | des lugar | Fernando de Rojas |
|------|------------------------|---|-----------|-------------------|
| 1482 | Diego de San Pedro | <i>Arnalte y Lucenda</i> | 1 | |
| 1497 | Lucena | <i>Repetición de amores</i> | 1 | x |
| 1513 | Pedro Ximenez de Urrea | <i>Penitencia</i> | 2 | |

| 1534 | Feliciano de Silva | <i>Segunda Celestina</i> | 1 | |
| 1543 | Sancho de Muñón | <i>Tragicomedia de Lisandro y Roselia</i> | 1 | |

6.2.9 The ninth proof

One statement of Ana Vian got my attention, because she stated that¹⁵⁶:

El Diálogo de las Transformaciones employs, as does *El Crotalón* and all works of Villalón, the verbal form *fue* for the first person of the undefined verb *ser* (*fui*), a rare form already in the prose of the mid sixteenth century despite still existing in the work *Guzmán de Alfarache*.

According to Ana Vian this is a significant feature, even if it is not conclusive in itself, especially when in *El Diálogo de las Transformaciones* *fue* and *fui* are alternating. Consequently it could be another proof in the case of *El Peregrino* and therefore we decided to make a simple proof with the words “yo fue” or “fue yo”, hoping that *El Peregrino* would appear. This simple test proved that there was indeed a link between *La Celestina* and *El Peregrino*.

Occurence of the words *yo fue* and *fue yo*

| Year | Author | Book | Quantity |
|------|---------------|--|----------|
| 1494 | Boccaccio | <i>Ilustres mujeres</i> | 1 |
| 1498 | Anonym | <i>El baladro del sabio Merlín con sus profecías</i> | 1 |
| 1507 | La Celestina | <i>Celestina complete work</i> | 1 |
| 1516 | Hernando Díaz | <i>El Peregrino</i> | 3 |
| 1538 | Anonym | <i>Crotalón</i> | 2 |

In line with the observation of Ana Vian we also made an analysis of the word *fueste* instead of *fuiste* and again saw quite interesting figures. Surprisingly enough we found only three works in my database of many books of the 15th and 16th century, in which the word *fueste* was found several times:

¹⁵⁶ VIAN, Ana (1984) *El diálogo de las transformaciones y el enigma de su autoría*. In: Dicenda. Cuadernos de Filología Hispánica, Nº. 3, pp. 117-140. Citation on p. 132

Occurence of the word *fueste*

| Year | Author | Book | Quantity |
|------|--|---|----------|
| 1507 | La Celestina | <i>Celestina complete work</i> | 4 |
| 1516 | Hernando Díaz | <i>El Peregrino</i> | 19 |
| 1530 | Anonym (Cristóbal de Villalón) | <i>Diálogo de las transformaciones de Pitágoras</i> | 7 |
| 1538 | Anonym (Cristóbal de Villalón) | <i>Crotalón</i> (Manuscript) | 3 |
| 1536 | Bachiller Villalón Medina del Campo | <i>Tragedia de Mirrha</i> (Printer: Pedro Touraus) | 3 |

Another trial with the word *fueme* also gave interesting results and the found works betray the possible authorship of Lucena, although the word *fueme* does not figure in *Arte de Ajedrez con CL Juegos de Partido* and *Repetición de amores*.

Occurence of the word *fueme*

| Year | Author | Book | Quantity |

| 1517 | Juan Acuario | <i>Renaldos de Montalbán – Balbo – 4 ° libro</i> | 1 |

6.2.10 The tenth proof

The word *turbación* is a typical word used by Lucena and this is another way to trace his activities. We find it in many books that could have been written by Lucena, among them:

Occurence of the word *turbación*

| Year | Author | Book | Quantity |
|------|--------------------|-----------------------------|----------|
| 1491 | Diego de San Pedro | <i>Arnalte y Lucena</i> | 4 |

| 1499 | Fernando de Rojas | <i>La Celestina</i> | 5 |
| 1497 | Lucena | <i>Repetición de amores</i> | 2 |
| 1513 | Hernán Díaz | <i>El Peregrino</i> | 1 |

6.2.11 The eleventh proof

Lucena liked to use the words *linda* in his *Repetición de amores*, but we do not find the word *lindo(s)* in it. We only find the word *lindos* in the first chapter of *La Celestina*, and this could be a proof that Lucena did not write the whole work. We find both the words *linda(s)* and *lindo(s)* in works that could have been written by him, among them:

Occurence of the word *linda*

| Year | Author | Book | Quantity |

| 1513 | Hernán Díaz | <i>El Peregrino</i> | 15 |
| 1530 | Francisco Delicado | <i>Lozana Andaluza</i> | 10 |

6.2.12 The twelfth proof

It appears that the word *liuianamente* or *livianamente* was only used by Lucena in his *Arte de ajedrez, con CL juegos de partido*. Consequently this strange word helps us to find works that could have been written by Lucena.

Occurence of the word *liuianamente* or *liaianamente*

* = *liuianamente*

6.2.13 The thirteenth proof

Another typical word that Lucena used was *esclarecido*. It was not used very much by other authors and for that reason it gives us an indication of the works that could have been written by Lucena.

Occurence of the word *esclarecido(s)* and *esclarecida(s)*

| Year | Author | Book | Quantity |

| 1537 | Ludovico Escrivea | <i>Tribunal de Venus</i> | 1 |
| 1547 | Jeronimo Fernández | <i>Belianis de Grecia</i> | 1 |

6.2.14 The fourteenth proof

We observe a valencianism¹⁵⁷ in the text of *El Peregrino*:

Ya son tres horas que Ginebra ha resuscitado, y tú aún estás muerto.

The right way in Spanish is: *son las tres*

¹⁵⁷ CASANOVA, Emili (2008). Sobre los valencianismos del castellano de Valencia en los siglos XVII-XIX. Servicio de Publicaciones de la Universidad de Navarra.

6.3 Conclusion

Francesch Vicent (Lucena) did not like to reveal his real name in public life. So he used the name Francesco in Ferrara where he came into contact with many scholars, among them Jacopo Caviceo who learned all about *La Celestina* from Lucena. In Rome Lucena used the name Ludovico Vicentino degli Arrighi and people knew him as “Il Vicentino”.

When publishing a book again, Lucena used a different name so that people could not trace him. He published the work of *El Peregrino* by the name of Hernando Díaz. JGAAP detected that this work was written by Lucena.

On the other hand the manuscript of Palacio that has two poetic compositions of the *Mur* at the end showed the calligraphy of Ludovico Vicentino degli Arrighi, although scholars thought that it was written by Hernando Diaz.

Thanks to the work of Rolf Eberenz we could obtain another linguistic proof concerning the words *tendr..* and *vendr..* which are abundantly used in *El Peregrino*, revealing the linguistic style of Lucena.

Like *La Celestina*, *Propalladia*, and *Lozana Andaluza*, Lucena under the pseudonym Hernán Díaz again had to deal with the University of Salamanca, where he was resident.
